*Who Killed Shastri?* Nov 11 2020 It was the time of the Cold War. After defeating Pakistan in the second biggest armed conflict since the Second World War, Indian Prime Minister Lal Bahadur Shastri arrived in Tashkent, former USSR, to sign a peace accord. After days of extended negotiations, the peace agreement was signed between India and Pakistan in the presence of Alexei Kosygin, the USSR Premier. Hours later, at 1.32 AM, Shastri died in his dacha. Abruptly. Mysteriously. Soon after, his official Russian butler and the Indian cook attached to the Indian ambassador were arrested by the Ninth Directorate of the KGB under the suspicion of poisoning Shastri. No post-mortem was done. No confession was achieved. There was no judicial enquiry ever. It's been 50 years since his death, and we still don't know the truth. Was it really a heart attack? Was he poisoned? Did the CIA kill him? Was it the KGB? Was it a state-sponsored murder? Vivek Ranjan Agnihotri along with his motley team of inexperienced assistants turned whistle-blowers investigate the mystery behind Shastri's death and find themselves in a mirror-world where all and everybody is suspect. But they cannot remain distant, for the painful story of India touches their own lives as they discover how the country was put up for sale.

**Electoral Dynamics in the States of India** Oct 03 2022 This empirically rich volume presents a holistic picture of the electoral process in Indian states and the return of the BJP to power. Drawing on the 2019 elections, it presents ground-level data to understand various aspects of elections: the nature of campaigning, caste, class and identity politics, electoral issues, poll strategies of different parties in the fray, electoral issues, electoral verdicts, the contestants, the leadership factor, the formation of government, among other empirical details. The essays underline the determinants of electoral behaviour by looking into the correlation between the background variables of voters and their voting choices. The essays also compare and contrast the 2019 election verdicts from the earlier elections held in the state under study. A long view of Indian state politics, this book will be essential reference for scholars and researchers of politics, especially political processes, and South Asian studies.

Evolution, Biodiversity and a Reassessment of the Hygiene Hypothesis Oct 30 2019 This edited collection of 12 chapters by research workers from a wide range of disciplines resolves the confusion that currently surrounds the “hygiene hypothesis” by considering the human need for exposure to microorganisms from an evolutionary point of view. The book explains why we evolved a requirement for exposure to microbiota from our mothers, from other people, and from the natural environment. It also explains the physiological roles of these exposures, what goes wrong when the exposures are distorted and how human lifestyles and activities, including degradation of the natural environment, are leading to this distortion. Particular attention is given to the range of pathologies associated with inappropriate microbial exposures and inappropriate colonization, including immunoregulatory problems such as allergies and autoimmunity, metabolic problems such as obesity and diabetes, and problems of central nervous system function and neurodegeneration. This book is of profound relevance to most medical disciplines, but also to those concerned with preserving the natural environment and with developing healthier urbanisation.

**Computational Architectures Integrating Neural and Symbolic Processes** Jul 20 2021 Computational Architectures Integrating Neural and Symbolic Processes: A Perspective on the State of the Art focuses on a currently emerging body of research. With the reemergence of neural networks in the 1980s with their emphasis on overcoming some of the limitations of symbolic AI, there is clearly a need to support some form of high-level symbolic processing in connectionist networks. As argued by many researchers, on both the symbolic AI and connectionist sides, many cognitive tasks, e.g. language understanding and common sense reasoning, seem to require high-level symbolic capabilities. How these capabilities are realized in connectionist networks is a difficult question and it constitutes the focus of this book. Computational Architectures Integrating Neural and Symbolic Processes addresses the underlying architectural aspects of the integration of neural and symbolic processes. In order to provide a basis for a deeper understanding of existing divergent approaches and provide insight for further developments in this field, this book presents: (1) an examination of specific architectures (grouped together according to their approaches), their strengths and weaknesses, why they work, and what they predict, and (2) a critique/comparison of these approaches. Computational Architectures Integrating Neural and Symbolic Processes is of interest to researchers, graduate students, and interested laymen, in areas such as cognitive science, artificial intelligence, computer science, cognitive psychology, and neurocomputing, in keeping up-to-date with the newest research trends. It is a comprehensive, in-depth introduction to this new emerging field.

**Annual Reports on NMR Spectroscopy** Oct 11 2020 Nuclear magnetic resonance (NMR) is an analytical tool used by chemists and physicists to study the structure and dynamics of molecules. In recent years, no other technique has gained such significance as NMR spectroscopy. It is used in all branches of science in which precise structural determination is required and in which the nature of interactions and reactions in solution is being studied. Annual Reports on NMR Spectroscopy has established itself as a premier means for the specialist and non-specialist alike to become familiar with new techniques and applications of NMR spectroscopy. Provides updates on the latest developments in NMR spectroscopy Includes comprehensive review articles Highlights the increasing importance of NMR spectroscopy as a technique for structural determination

**Paul's Fundamental Immunology** Jun 06 2020 Selected as a Doody's Core Title for 2022! Defining the field of immunology for 40 years, Paul's Fundamental Immunology continues to provide detailed, authoritative, up-to-date information that uniquely bridges the gap between basic immunology and the disease process. The fully revised 8th edition maintains the excellence established by Dr. William E. Paul, who passed away in 2015, and is now under new editorial leadership of Drs. Martin F. Flajnik, Nevil J. Singh, and Steven M. Holland. It's an ideal reference and gold standard text for graduate students, post-doctoral fellows, basic and clinical immunologists, microbiologists and infectious disease physicians, and any physician treating diseases in which immunologic mechanisms play a role.

**Dava Shastri's Last Day** Nov 04 2022 In this novel "full of music, magnetism, and familial obligation" (Emma Straub, author of All Adults Here) a dying billionaire matriarch leaks news of her death early so she can examine her legacy—a decision that horrifies her children and inadvertently exposes secrets she has spent a lifetime keeping. Dava Shastri, one of the world's wealthiest women, has always lived with her sterling reputation in mind. A brain cancer diagnosis at the age of seventy, however, changes everything, and Dava decides to take her death—like all matters of her life—into her own hands. Summoning her four adult children to her private island, she discloses shocking news: in addition to having a terminal illness, she has arranged for the news of her death to break early, so she can read her obituaries. As someone who dedicated her life to the arts and the empowerment of women, Dava expects to read articles lauding her philanthropic work. Instead, her "death" reveals two devastating secrets, truths she thought she had buried forever. And now the whole world knows, including her children. In the time she has left, Dava must come to terms with the decisions that have led to this moment—and make peace with those closest to her before it's too late. Compassionately written and chock-full of humor and heart, this powerful novel examines public versus private legacy, the complexities of love, and the never-ending joys—and frustrations—of family. Includes a Reading Group Guide. A Good Morning America and Lilly Singh's Lilly Library Book Club pick Most anticipated in fall 2021 by TIME, The Washington Post, Bustle, Goodreads, and Debutiful • An Indie Next Pick • A Publishers Marketplace Buzz Book for Fall/Winter 2021 • Longlisted for the 2021 Center for Fiction First Novel Prize

**Entrepreneurship in India** May 06 2020 The economic liberalization in India over the last three decades has provided a wealth of opportunity for entrepreneurs looking to start and expand their businesses. Since the economy opened up in the 1990s, entrepreneurial activity in the private sector has been largely responsible for the strong economic growth experienced in the country. India is presently the world's third largest source of start-ups, and was ranked the second most entrepreneurial country in the world in the recent Global Entrepreneurship Monitor (GEM) report, ahead of large economic powerhouses such as the United States, China and the UK. Entrepreneurship in India looks at the dynamic and changing nature of entrepreneurship in India. The book examines the history of entrepreneurship in India, different entrepreneurship models adopted, the entrepreneurial ecosystem and looks at the future of entrepreneurship in the country. This book will benefit businesspeople, policy makers and researchers looking to understand more about entrepreneurship in India, and offers guidance to foreign businesses looking to engage with entrepreneurs in India.

India's Foreign Relations, 1947-2007 May 18 2021 This book analyses India's relations with its neighbours (China, Pakistan, Bangladesh, Sri Lanka) and other world powers (USA, UK, and Russia) over a span of 60 years. It traces the roots of independent India's foreign policy from the Partition and its fallout, its nascent years under Nehru, and non-alignment to the influence of economic liberalization and globalization. The volume delves into the underlying reasons of persistent problems confronting India's foreign policy-makers, as well as foreign-policy interface with defence and domestic policies. This book will be indispensable to students, scholars and teachers of South Asian studies, international relations, political science, and modern Indian history.

**Lal Bahadur Shastri: Lessons in Leadership** Nov 23 2021

**NMR Methods for Characterization of Synthetic and Natural Polymers** Dec 01 2019 Since the introduction of FT-NMR spectroscopy around five decades ago, NMR has achieved significant advances in hardware and methodologies, accompanied with the enhancement of spectral resolution and signal sensitivity. Rapid developments in the polymers field mean that accurate and quantitative characterization of polymer structures and dynamics is the keystone for precisely regulating and controlling the physical and chemical properties of the polymer. This book specifically focuses on NMR investigation of complex polymers for the polymer community as well as NMR spectroscopists, and will push the development of both fields. It covers the latest advances, for example high field DNP and ultrafast MAS methodologies, and show how these novel NMR methods characterize various synthetic and natural polymers.

**All-Optical Signal Processing** Jan 26 2022 This book provides a comprehensive review of the state-of-the art of optical signal processing technologies and devices. It presents breakthrough solutions for enabling a pervasive use of optics in data communication and signal storage applications. It presents presents optical signal processing as solution to overcome the capacity crunch in communication networks. The book content ranges from the development of innovative materials and devices, such as graphene and slow light structures, to the use of nonlinear optics for secure quantum information processing and overcoming the classical Shannon limit on channel capacity and microwave signal processing. Although it holds the promise for a substantial speed improvement, today's communication infrastructure optics remains largely confined to the signal transport layer, as it lags behind electronics as far as signal processing is concerned. This situation will change in the near future as the tremendous growth of data traffic requires energy efficient and fully transparent all-optical networks. The book is written by leaders in the field.

Elements of Differential Topology Oct 23 2021 Derived from the author's course on the subject, Elements of Differential Topology explores the vast and elegant theories in topology developed by Morse, Thom, Smale, Whitney, Milnor, and others. It begins with differential and integral calculus, leads you through the intricacies of manifold theory, and concludes with discussions on algebraic topol

Contemporary Indian English Dec 25 2021 Contemporary Indian English: Variation and Change offers the first comprehensive description of Indian English and its emerging regional standard in a corpus-linguistic framework. Drawing on a wealth of authentic spoken and written data from India (including the Kolhapur Corpus and the International Corpus of English), this book explores the dynamics of variation and change in the vocabulary and grammar of contemporary Indian English. The aims are to document the extent of lexical and grammatical nativization at the beginning of the twenty-first century and compare contemporary Indian English to other varieties around the world (for example British and American English). The results are relevant to sociolinguists, variationists and lexicologists seeking to investigate ongoing language change in emerging standard varieties of English. With its strong empirical foundation and its comparative outlook, the book is also of interest to anyone looking for an introduction to the corpus-based description of varieties of English.

Lions 317C District Directory Jul 28 2019 Lions District 317C consists of Shimoga, Udipi, Davangere and Chitradurga Revenue Districts of Karnataka State in India. More than 2600 Lions in 86 Clubs serve the community nearby. District Governor MJF Lion Dr Tallur Shivaram Shetty released the Print Edition of the the District Directory for 2018-19, containing all the Lionistic information. This Digital Edition is a replica of the Print Edition, with all the information, but updated frequently with latest information. This digital edition enable portability of Directory information and the Lions can read it in their Mobile Phones while on the move.

**A Companion to Sanskrit Literature** Aug 21 2021 A Companion to Sanskrit Literature, the first work of its kind, covers a period of nearly 3500 years from the Vedic age down to the modern times. It seeks to acquaint the reader, within a brief compass, with the contents of outstanding works and authors in Sanskrit literature, followed by up-to-date bibliographies. It presents brief accounts of the important character in well-known poems, dramas and prose works have also been given. Important geographical names, with their modern identification as far as practicable, have also been laid down. Common technical terms, used in the different branches of Sanskrit literature, have been briefly explained, Prominent figures in myths and legends have been dealt with. In a number of appendices, various kinds of useful information about Sanskrit literature including sciences, sports and pastimes, etc. in ancient and medieval India have been set forth. It is an indispensable vade mecum for the general readers, the specialists and researchers. It is like a capsule taking the reader through the vast firmament of Sanskrit literature upto remote ages.

**Computational Neuroscience: Trends in Research 2003** Sep 29 2019 This volume includes papers originally presented at the 11th annual Computational Neuroscience Meeting (CNS 02) held in July 2002 at the Congress Plaza Hotel & Convention Center in Chicago, Illinois, USA. The CNS meetings bring together computational neuroscientists representing many different fields and backgrounds as well as many different experimental preparations and theoretical approaches. The papers published here range from pure experimental neurobiology, to neuro-ethology, mathematics, physics, and engineering. In all cases the research described is focused on understanding how nervous systems compute. The actual subjects of the research include a highly diverse number of preparations, modeling approaches and analysis techniques. Accordingly, this volume reflects the breadth and depth of current research in computational neuroscience taking place throughout the world.

Buddhist Philosophy from 350 to 600 A.D. May 30 2022 The aim of this series is to present the contents of different streams of indian philosophical texts to make more and more people aware about Indian philosophical thought. This multi volume work presents Indian thought, citing experts on the point that seem debatable. So far, 9 volumes have been brought out. Volume one provides a list of sources which are surveyed in the subsequent volumes as well as provides a guide to secondary literature for further study of Indian philosophy. Volume 2 provides a detailed resume of current knowledge about hte classical Indian philosophical system of Nyaya-Vaisesika in its earlier stages. Volume 3 summarizes early Advaita Vedanta upon

Sankara's pupils. Volume 4 discusses the history of the system and its philosophical overall. This present volume attempts to cover the development of Buddhist philosophical notions from the time of Vasubandhu and his critic Samghabhadra. It is a glorious period in Indian history, the time of the Gupta kings."

**AKASHVANI** Aug 28 2019 "Akashvani" (English) is a programme journal of ALL INDIA RADIO, it was formerly known as The Indian Listener. It used to serve the listener as a bradshaw of broadcasting ,and give listener the useful information in an interesting manner about programmes, who writes them, take part in them and produce them along with photographs of performing artists. It also contains the information of major changes in the policy and service of the organisation. The Indian Listener (fortnightly programme journal of AIR in English) published by The Indian State Broadcasting Service, Bombay, started on 22 December, 1935 and was the successor to the Indian Radio Times in English, which was published beginning in July 16 of 1927. From 22 August ,1937 onwards, it used to published by All India Radio, New Delhi. From 1950,it was turned into a weekly journal. Later, The Indian listener became "Akashvani" (English ) w.e.f. January 5, 1958. It was made fortnightly journal again w.e.f July 1,1983. NAME OF THE JOURNAL: AKASHVANI LANGUAGE OF THE JOURNAL: English DATE, MONTH & YEAR OF PUBLICATION: 8 JANUARY, 1967 PERIODICITY OF THE JOURNAL: Weekly NUMBER OF PAGES: 80 VOLUME NUMBER: Vol. XXXII, No. 2 BROADCAST PROGRAMME SCHEDULE PUBLISHED (PAGE NOS): 12-79 ARTICLE: 1. For reproduction previous permission is essential.

**Negotiating Universalism in India and Latin America** Sep 09 2020 This book explores how vertical inter-governmental political and fiscal bargains and horizontal variation in political, social and economic conditions across regions contribute to or undermine the provision of inclusive and sustainable social policies at the subnational level in Latin America and India. The question of how to advance universal social rights while reducing territorial inequalities has been a central dilemma for Latin America and India. After several decades of ambitious decentralization reforms in both regions, the balance between local accountability versus centralized planning remains a theoretical and empirical problem in need of systematic exploration. The chapters in this volume incorporate both federal and decentralized unitary states, pointing to common political tensions across unitary and federal settings despite the typically greater institutionalization of regional autonomy in federal countries. The contributors examine the territorial dimension of universalism and explore, in greater and empirical detail, the causal links between fiscal transfers, social policies and outcomes, and highlight the political dynamics that shape fiscal decentralization reforms and the welfare state. The chapters in this book were originally published as a special issue of Regional & Federal Studies.

**Proceedings of the 2nd International Conference on Data Engineering and Communication Technology** Mar 04 2020 This book features research work presented at the 2nd International Conference on Data Engineering and Communication Technology (ICDECT) held on December 15–16, 2017 at Symbiosis International University, Pune, Maharashtra, India. It discusses advanced, multi-disciplinary research into smart computing, information systems and electronic systems, focusing on innovation paradigms in system knowledge, intelligence and sustainability that can be applied to provide feasible solutions to varied problems in society, the environment and industry. It also addresses the deployment of emerging computational and knowledge transfer approaches, optimizing solutions in a variety of disciplines of computer science and electronics engineering.

**Socio-cultural Inspired Metaheuristics** Apr 04 2020 This book presents the latest insights and developments in the field of socio-cultural inspired algorithms. Akin to evolutionary and swarm-based optimization algorithms, socio-cultural algorithms belong to the category of metaheuristics (problem-independent computational methods) and are inspired by natural and social tendencies observed in humans by which they learn from one another through social interactions. This book is an interesting read for engineers, scientists, and students studying/working in the optimization, evolutionary computation, artificial intelligence (AI) and computational intelligence fields.

The Wrestler's Body Feb 01 2020 The Wrestler's Body tells the story of a way of life organized in terms of physical self-development. While Indian wrestlers are competitive athletes, they are also moral reformers whose conception of self and society is fundamentally somatic. Using the insights of anthropology, Joseph Alter writes an ethnography of the wrestler's physique that elucidates the somatic structure of the wrestler's identity and ideology. Young men in North India may choose to join an akhara, or gymnasium, where they subject themselves to a complex program of physical and moral fitness. Alter's first-hand description of each detail of the wrestler's regimen offers a unique perspective on South Asian culture and society. Wrestlers feel that moral reform of Indian national character is essential and advocate their way of life as an ideology of national health. Everyone is called on to become a wrestler and build collective strength through self-discipline.

The Method of Early Advaita Vedānta Dec 13 2020 This is a unique work discussing the teachings of four of the great Advaita Acaryas : Gaudapada, Sankara, and his two disciples, Suresvara and Padmapada. The first three chapters are concerned with the teachings of Gaudapada. These chapters refer to most o

*The Natural Anti-Gal Antibody as Foe Turned Friend in Medicine* Jan 02 2020 The Natural Anti-Gal Antibody as Foe Turned Friend in Medicine provides a comprehensive review of the natural anti-Gal antibody, which is the most abundant antibody in humans constituting ~1% of immunoglobulins and the carbohydrate antigen it recognizes, the  $\alpha$ -gal epitope. It discusses the discovery of this antigen/antibody system, its evolution in mammals, the pathological effects of this antibody, and its possible use in various therapies in humans. Most significantly, the book discusses microbial and regenerative therapies in which an antibody present in all humans may be harnessed as an in vivo pharmaceutical agent that enables a wide variety of therapies. Some of these therapies are described as experimental studies that are compiled in this book, other already studied therapies in the area of cancer immunotherapy are also included in this book. Provides tactics on how to improve cancer immunotherapy and viral vaccine immunogenicity Includes discussions on therapies that accelerate the healing of normal and chronic wounds, and of burns Covers the regeneration of bio-implants

**Journal of Haryana Studies** Apr 28 2022

**Stargazing** Jun 18 2021 From being Champion of Champions to one of the world's top cricket commentators to Team India's head coach, Ravi Shastri has an incomparable perspective when it comes to the game of cricket. In Stargazing: The Players in My Life, the legendary all-rounder looks back at the extraordinary talent he has encountered over the years. Who is the former Indian captain who didn't do full justice to his talent? Or that bruising bowler who went on to become a best friend? What was the most important lesson the legendary Clive Llyod taught him? How does Shastri set aside his personal bond with Virat Kohli in his role as coach? Full of never-before-revealed anecdotes, Stargazing, co-written with Ayaz Memon and featuring illustrations by Shiva Rao, offers a glimpse into how champions from across the globe have inspired one of the world's greatest ODI players and Team India's most successful Test cricket coach.

The mRNA Metabolism in Human Disease Apr 16 2021 The eukaryotic gene expression pathway involves a number of interlinked steps, with messenger RNA (mRNA) being the key intermediate. The precursor mRNA is transcribed from DNA, processed by removal of introns and addition of the cap structure and the poly(A) tail. The mature mRNA is then exported to the cytoplasm where it is translated into protein and finally degraded. In this process, mRNA is associated with RNA-binding proteins forming ribonucleoprotein complexes, whose protein content evolves throughout the lifetime of the mRNA. While the complexity of eukaryotic gene expression allows the production of proteins to be controlled at many levels, it also makes the process vulnerable to errors. Although eukaryotic cells have evolved elaborate mRNA quality control mechanisms that ensure the fidelity of gene expression, some defects are not detected, thus affecting mRNA metabolism. This condition plays a fundamental role in the pathogenesis of several disease processes, such as neurodegeneration and oncogenesis. Besides, exciting recent data have shown that cellular RNAs can be modified post-transcriptionally via dynamic and reversible chemical modifications, the so-called epitranscriptome. These modifications can alter mRNA structure, being able to modulate different steps of the mRNA metabolism that can be associated with various human diseases, such as systemic lupus erythematosus and cancer. This book provides a collection of novel studies and hypotheses aimed to define the pathophysiological consequences of altered mRNA metabolism events in human cells, and is written for a wide spectrum of readers in the field of gene expression regulation. The last chapter highlights how the discovery of disease-causing defects (or modifications) in mRNA can provide a variety of therapeutic targets that can be used for the development of new RNA-based

therapeutics. Hopefully, it may also contribute to inspire the drug-developing scientific community.

The Centrality of Ethics in Buddhism Jul 08 2020 This book, through extensive textual study, explores the Buddha's and Buddhism's uncompromising and unflinching emphasis on the centrality of ethics as against any pernicious dogmas and metaphysical beliefs, and their attempts to causally relate moral perfection to soteriological or eschatological goal. What is most admirable about Buddhism is that it integrates the vertical development of human consciousness, for which the other is the necessary condition, with the gradual development of morality. It was this emphasis which separated Siddhartha, before he attained the Awakened Wisdom (bodhi), from his teachers - Alara Kalama and Uddaka Ramaputta - and it is for this reason that the Buddha calls himself and his Dhamma Patisotagami, i.e. going against the currents of the prevailing dogmas and pernicious beliefs. In brief, Buddhism is about overcoming of suffering, the greatest evil, through ethicization of human consciousness and conduct, which also takes care of the ethicization of the society and the universe. Besides, some of the essays of this book explore many other themes like Buddhist epistemology, nature of self, time, and intercultural.
