Fight Sep 29 2019 In this five-session video-based small group Bible study, pastor and bestselling author Craig Groeschel explores the life of Samson, helping you uncover who you really are--a man created with a warrior's heart in the image of God--and how to stand up and fight for what's right. Find the strength to fight the battles you know you need to fight--the ones that determine the state of your heart, the quality of your marriage, and the spiritual health of your family. The battles that make you dependent on God as the source of your strength. The battles that make you come alive. Craig looks at the life of Samson, showing how much we have in common with this guy. Things didn't work out so well for him in the end. But by looking at his life, you'll learn how to defeat the demons that make strong men weak. You'll become who God made you to be--a man who knows how to fight for what's right. Learn how to fight with faith, with prayer, and with the Word of God. Then, when your enemy begins to attack, fight for the righteous cause that God gave you. Draw a line in the sand. Make your enemy pay. Make sure he gets the message. Don't cross a warrior. Don't mess with this man of God. Come out fighting. And don't show up for this fight unarmed. Use the weapons God gave you, and you'll win. Can you feel it? It's inside you. It's time to fight like a man. Son of Sedonia Jun 26 2019 Imagine growing up in the largest slum on the planet in the year 2080AD. Twenty million people are your neighbors, huddled together in an ocean of rusted dwellings made from whatever Sedonia City, the towering metropolis in the distance, decides to throw away. Gang members, known as the T99s, are the heads of your community: smuggling tech, trafficking drugs, and fighting a constant guerilla war against the City's bio-augmented EXO police force. There is little hope for survival. None for escape to a better life beyond the half-mile high Border between city and slum. This is Matteo's world. A bright kid, but sick and weak since childhood, he is painfully dependent on Jogun: loving older brother, and hardened soldier for the T99s. When a luxury transport from Sedonia's aerial traffic crash-lands in Rasalla, it threatens to change Matteo and Jogun's fate forever. And all fates are connected. The Dwellers of Rasalla, bound by family in the scrap, ashes, and dirt. The Citizens of Sedonia, oblivious to danger in the buzzing twilight of the Neuro-Social Revolution. The EXOs, placing themselves in harm's way to perform their duty to protect their homes and fellow officers. And the Ruling Elite, whose long-buried secrets and desperate plans could spell the end of civilization...or a new beginning. Son of Sedonia is an action-filled science fiction epic with a soul and a clear message. Its characters live, breathe, suffer, and love in their different worlds, each brought to the brink as the Third-World collides with the First. Their future could well be ours.

The Revenge of Geography Dec 13 2020 NEW YORK TIMES BESTSELLER • In this “ambitious and challenging” (The New York Review of Books) work, the bestselling author of Monsoon and Balkan Ghosts offers a revelatory prism through which to view global upheavals and to understand what lies ahead for continents and countries around the world. In *The Revenge of Geography*, Robert D. Kaplan builds on the insights, discoveries, and theories of great geographers and geopolitical thinkers of the near and distant past to look back at critical pivots in history and then to look forward at the evolving global scene. Kaplan traces the history of the world's hot spots by examining their climates, topographies, and proximities to other embattled lands. The Russian steppe's pitiless climate and limited vegetation bred hard and cruel men bent on destruction, for example, while Nazi geopoliticians distorted geopolitics entirely, calculating that space on the globe used by the British Empire and the Soviet Union could be swallowed by a greater German homeland. Kaplan then applies the lessons learned to the present crises in Europe, Russia, China, the Indian subcontinent, Turkey, Iran, and the Arab Middle East. The result is a holistic interpretation of the next cycle of conflict throughout Eurasia. Remarkably, the future can be understood in the context of temperature, land allotment, and other physical certainties: China, able to feed only 23 percent of its people from land that is only 7 percent arable, has sought energy, minerals, and metals from such brutal regimes as Burma, Iran, and Zimbabwe, putting it in moral conflict with the United States. Afghanistan's porous borders will keep it the principal invasion route into India, and a vital rear base for Pakistan, India's main enemy. Iran will exploit the advantage of being the only country that straddles both energy-producing areas of the Persian Gulf and the Caspian Sea. Finally, Kaplan posits that the United States might rue engaging in far-flung conflicts with Iraq and Afghanistan rather than tending to its direct neighbor Mexico, which is on the verge of becoming a semifailed state due to drug cartel carnage. A brilliant rebuttal to thinkers who suggest that globalism will trump geography, this indispensable work shows how timeless truths and natural facts can help prevent this century's looming cataclysms.
