Clinical Ethics Handbook for Nurses Sep 09 2020 This handbook provides tools for nurse educators, ethics educators, practicing nurses and allied health professionals for developing confidence and skill in ethical decision making in interdisciplinary settings such as acute and chronic care hospitals and clinics. It is useful for all healthcare personnel who face ethical issues in the course of their work and who work with nurses to resolve these issues. While the content is based on a US context, the concerns of nurses internationally are discussed and emphasized. Nurses working in acute and chronic care settings face many obstacles to providing good care and are often the first line of defense related to patient safety and meeting the needs of patients and their families. Some of the obstacles to optimal patient care are institutional, some sociocultural, and others the result of inadequate communication. Evidence points to the idea that while nurses do have the knowledge and skills to address practice problems of various sorts, they may not be confident in their skills of ethical decision making and advocacy actions. This is a resource to develop moral agency on behalf of individuals and to address broader barriers to good care raised at the local, community, or social levels.

Concepts and Cases in Nursing Ethics - Third Edition Feb 12 2021 Concepts and Cases in Nursing Ethics is a case-based exploration of the core principles of health care ethics applied to nursing. The book is a collaboration between philosopher-ethicist Michael Yeo and nurse-ethicist and educators Anne Moorhouse, Pamela Khan, and Patricia Rodney. It thus combines philosophical and ethical analysis with extensive knowledge and experience in nursing and health care. The book is organized around six main concepts in health care ethics: beneficence, autonomy, truthfulness, confidentiality, justice, and integrity. A chapter is devoted to the elucidation of each of these concepts. In each chapter, historical background and conceptual analysis are supplemented by case studies that exemplify issues and show how the concept applies in health care and nursing practice. In this new edition, the conceptual analysis throughout has been updated and reworked in view of changes in the health care system. In addition, there is a new chapter specifically devoted to recent developments affecting nursing and other health professions. Previous case studies have been modified and new ones added to address current and emerging issues. Although the text focuses mainly on the social and political situation of nursing, the analysis has relevance also for medicine and the allied health professions, and indeed for anyone working in the health system.

<u>Ethics in Everyday Places</u> Sep 21 2021 An exploration of moral stress, distress, and injuries inherent in modern society through the maps that pervade academic and public communications worlds. In Ethics in Everyday Places, ethicist and geographer Tom Koch considers what happens when, as he puts it, "you do everything right but know you've done something wrong." The resulting moral stress and injury, he argues, are pervasive in modern Western society. Koch makes his argument "from the ground up," from the perspective of average persons, and through a revealing series of maps in which issues of ethics and morality are embedded. The book begins with a general grounding in both moral stress and mapping as a means of investigation. The author then examines the ethical dilemmas of mapmakers and others in the popular media and the sciences, including graphic artists, journalists, researchers, and social scientists. Koch expands from the particular to the general, from mapmaker and journalist to the readers of maps and news. He explores the moral stress and injury in educational funding, poverty, and income inequality ("Why aren't we angry that one in eight fellow citizens lives in federally certified poverty?"), transportation modeling (seen in the iconic map of the London transit system and the hidden realities of exclusion), and U.S. graft organ transplantation. This uniquely interdisciplinary work rewrites our understanding of the nature of moral stress, distress and injury, and ethics in modern life. Written accessibly and engagingly, it transforms how we think of ethics—personal and professional—amid the often conflicting moral injunctions across modern society. Copublished with Esri Press

Ethical Competence in Nursing Practice Mar 16 2021 This is a unique, innovative professional nursing ethics textbook designed specifically for all practicing nurses and to meet the educational needs of all nursing students, including RN to BSN and RN to MSN students. Written by experts in the field, it discusses ethical concepts relevant to the registered nurse who has practiced for several years but is learning higher level concepts and applications. This text addresses different areas of professional practice and is rich with case studies illustrating the need for ethical competence and decision making. The book fulfills the necessary criteria for the AACN Essentials for Baccalaureate Education and the QSEN and IOM competencies. It also integrates relevant provisions and statements from the revised Code for Nurses (ANA, 2015). Clear and concise, the text relates content to the nurse's current practice and introduces a framework for the development of ethical competence, from recognition of an ethical situation to implementation of a justifiable action. A decision-making model that includes elements of care and virtue ethics is also included. Essential communication and conflict skills are addressed, in addition to the role of the ethics committee and ethics consultation. The book discusses common ethical issues likely to be

encountered, how to recognize and address moral distress, and ethical practice as it relates to research, quality, and safety. Case studies that incorporate evidence-informed research provide the opportunity to develop ethical skills and apply decisionmaking principles. Relevant QSEN competencies and provisions and statements from the ANA's revised Code for Nurses (2015) are featured in each chapter. Interactive exercises and questions and PowerPoints provide further opportunity for critical thinking. KEY FEATURES: Addresses the specific needs of practicing nurses and students in the RN to BSN and RN to MSN courses Fulfills AACN Essentials, IOM competencies, and QSEN KSAs Integrates relevant provisions and statements from the revised Code for Nurses (ANA, 2015) Builds upon previous practice experience Discusses ethical competence in a variety of practice environments Includes case studies to apply ethical competencies

Ethics in Everyday Places Jan 14 2021 An exploration of moral stress, distress, and injuries inherent in modern society through the maps that pervade academic and public communications worlds. In Ethics in Everyday Places, ethicist and geographer Tom Koch considers what happens when, as he puts it, "you do everything right but know you've done something wrong." The resulting moral stress and injury, he argues, are pervasive in modern Western society. Koch makes his argument "from the ground up," from the perspective of average persons, and through a revealing series of maps in which issues of ethics and morality are embedded. The book begins with a general grounding in both moral stress and mapping as a means of investigation. Heart of Darkness Dec 13 2020

Moral Distress in the Health Professions Nov 04 2022 This is the first book on the market or within academia dedicated solely to moral distress among health professionals. It aims to bring conceptual clarity about moral distress and distinguish it from related concepts. Explicit attention is given to the voices and experiences of health care professionals from multiple disciplines and many parts of the world. Contributors explain the evolution of the concept of moral distress, sources of moral distress including those that arise at the unit/team and organization/system level, and possible solutions to address moral distress at every level. A liberal use of case studies will make the phenomenon palpable to readers. This volume provides information not only for academia and educational initiatives, but also for practitioners and the research community, and will serve as a professional resource for courses in health professional schools, bioethics, and business, as well as in the hospital wards, intensive care units, long-term care facilities, hospice, and ambulatory practice sites in which moral distress originates.

Health Care Ethics through the Lens of Moral Distress Aug 01 2022 This book provides a bridge between the theory to practice gap in contemporary health care ethics. It explores the messiness of everyday ethical issues and validates the potential impacts on health care professionals as wounded healers who regularly experience close proximity to suffering and pain. This book speaks to why ethics matters on a personal level and how moral distress experiences can be leveraged instead of hidden. The book offers contributions to both scholarship and the profession. Nurses, physicians, social workers, allied health care professionals, as well as academics and students will benefit from this book.

The Ethic of Care: a moral compass for Canadian nursing practice Jun 06 2020 "The Ethic of Care: A Moral Compass for Canadian Nursing Practice, is unique from other nursing ethics textbooks in several key ways. The book adds a heightened dimension to the already rich knowledge in the field of applied nursing ethics and the ethic of"

Moral Distress and School Social Work Practice Aug 21 2021

The Joy of the Gospel Jun 26 2019 The perfect gift! A specially priced, beautifully designed hardcover edition of The Joy of the Gospel with a foreword by Robert Barron and an afterword by James Martin, SJ. "The joy of the gospel fills the hearts and lives of all who encounter Jesus… In this Exhortation I wish to encourage the Christian faithful to embark upon a new chapter of evangelization marked by this joy, while pointing out new paths for the Church's journey in years to come." – Pope Francis This special edition of Pope Francis's popular message of hope explores themes that are important for believers in the 21st century. Examining the many obstacles to faith and what can be done to overcome those hurdles, he emphasizes the importance of service to God and all his creation. Advocating for "the homeless, the addicted, refugees, indigenous peoples, the elderly who are increasingly isolated and abandoned," the Holy Father shows us how to respond to poverty and current economic challenges that affect us locally and globally. Ultimately, Pope Francis demonstrates how to develop a more personal relationship with Jesus Christ, "to recognize the traces of God's Spirit in events great and small." Profound in its insight, yet warm and accessible in its tone, The Joy of the Gospel is a call to action to live a life motivated by divine love and, in turn, to experience heaven on earth. Includes a foreword by Robert Barron, author of Catholicism: A Journey to the Heart of the Faith and James Martin, SJ, author of Jesus: A Pilgrimage

Compassion Fatigue and Burnout in Nursing Jun 18 2021 Print+CourseSmart

Moral Distress and You May 30 2022

Empirical Bioethics Oct 23 2021 Bioethics has long been accepted as an interdisciplinary field. The recent 'empirical turn' in bioethics is, however, creating challenges that move beyond those of simple interdisciplinary collaboration, as researchers grapple with the methodological, empirical and meta-ethical challenges of combining the normative and the empirical, as well as navigating the difficulties that can arise from attempts to transcend traditional disciplinary boundaries. Empirical Bioethics: Theoretical and Practical Perspectives brings together contributions from leading experts in the field which speak to these challenges, providing insight into how they can be understood and suggestions for how they might be overcome. Combining discussions of meta-ethical challenges, examples of different methodologies for integrating empirical and normative research, and reflection on the challenges of conducting and publishing such work, this book will both introduce the novice to the field and challenge the expert.

Moral Resilience Oct 03 2022 Suffering is an unavoidable reality in health care. Not only are patients and families suffering but also the clinicians who care for them. Commonly the suffering experienced by clinicians is moral in nature, in part a reflection of the increasing complexity of health care, their roles within it, and the expanding range of available interventions. Moral suffering is the anguish that occurs when the burdens of treatment appear to outweigh the benefits; scarce human and material resources must be allocated; informed consent is incomplete or inadequate; or there are disagreements about goals of treatment among patients, families or clinicians. Each is a source of moral adversity that challenges clinicians' integrity: the inner harmony that arises when their essential values and commitments are aligned with their choices and actions. If moral suffering is unrelieved it can lead to disengagement, burnout, and undermine the quality of clinical care. The most studied response to moral adversity is moral distress. The sources and sequelae of moral distress, one type of moral suffering, have been documented among clinicians across specialties. It is vital to shift the focus to solutions and to expanded individual and system strategies that mitigate the detrimental effects of moral suffering. Moral resilience, the capacity of an individual to restore or sustain integrity in response to moral adversity, offers a path forward. It encompasses capacities aimed at developing self-regulation and self-awareness, buoyancy, moral efficacy, self-stewardship and ultimately personal and relational integrity. Clinicians and healthcare organizations must work together to transform moral suffering by cultivating the individual capacities for moral resilience and designing a new architecture to support ethical practice. Used worldwide for scalable and sustainable change, the Conscious Full Spectrum approach, offers a method to solve problems to support integrity, shift patterns that undermine moral resilience and ethical practice, and source the inner potential of clinicians and leaders to produce meaningful and sustainable results that benefit all.

Issues in Palliative Care Research May 18 2021 Symptom control, management of psychosocial and spiritual concerns, decision-making consistent with values and goals, and care of the imminently dying that is appropriate and sensitive are among the critical issues in palliative care. This book explores progress

made and future goals.

Nursing Ethics in Everyday Practice Dec 01 2019 This book is written specifically for bedside/staff nurses at the front lines of health care in hospitals, hospice, long-term care, and home health care. Presented in a simple, easy-to-read and engaging style so that nurses can readily put the information to use in a clinical setting. Provides a framework that staff nurses can implement to resolve the ethical dilemmas they frequently encounter in practice. Great for students and covers both theory and practical applications.

Nurses and COVID-19: Ethical Considerations in Pandemic Care Aug 09 2020 This book addresses the many ethical issues and extraordinary risks that nurses and others are facing during the COVID-19 pandemic, which creates physical, emotional, and economic burdens, affecting nurses' overall health and well-being. Nurses are essential front-line clinicians across all health care settings and in every nation. The COVID-19 pandemic caused by the novel SARs-CoV-2 virus has affected children, adults, and communities within and across all societies. Nurses, too, have contracted the virus and died from the disease. They have also seen their colleagues, family members, and friends hospitalized or in intensive care units struggling to survive. Nursing's professionalism and disciplinary resolve to care for patients and families amidst confusion, misinformation, and shifting guidelines has been called "heroic" by the public. How much risk should nurses be expected to accept during a pandemic? How do nurses help patients and families find comfort and dignity at the end-of-life? How do we help nurses who are suffering from moral distress and mental health concerns from what they have seen, been asked to do, or are unable to provide? And, how does society move forward from a pandemic that has challenged our basic ethical principles of justice and what is "fair, good and right" in caring for those who need care, including the most vulnerable and nurses themselves? This book addresses these and other ethical concerns that nurses are facing in their day-to-day clinical practice; experiences shared with patients, families, and colleagues. Although this book was written while the pandemic was still raging across the United States and globally, the events needed to be told as they were unfolding. This book helps us to learn from both the successes and failures that are affecting so many across the globe, including those on whom the public relies on to provide quality, compassionate, and expert care when they are sick: nurses.

Moral Distress and Injury in Human Services Jun 30 2022 "Moral injury is defined as the sort of harm that results when someone has perpetrated, failed to prevent, or witnessed acts that transgress deeply held moral beliefs. Social workers and other human services professionals are well versed in the ravages, symptoms, and treatment of the complicated forms of posttraumatic stress that accompany moral injury, and the issue has been gaining attention. The purpose of this book is to provide in-depth discussion of the concepts of moral injury, moral distress, and moral demoralization; common causes; the ways in which moral injury, moral distress, and moral demoralization are manifested; the causes of moral injury, moral distress, and moral demoralization; secondary trauma, including the ways in which moral injury, moral distress, and moral demoralization affect practitioners; ethical/moral dilemmas; prevention strategies; the role of advocacy and moral courage; and practitioner self-care and resilience. The book includes extensive case examples (clinical, administration, policy practice, advocacy) drawn from the author's experience in and consultation with practitioners employed in public welfare offices, mental health agencies (residential and nonresidential), child and family services programs (residential and nonresidential), substance use programs (residential and nonresidential), housing and homelessness programs, prisons, schools, hospitals, military settings, private/independent practice, immigration and refugee resettlement programs, nursing homes, HIV/AIDS programs, disabilities services programs, hospice programs, and parole/probation offices, among others"--

Ethical Dilemmas in Psychotherapy May 06 2020 New and experienced psychotherapists alike can find themselves overwhelmed by an ethical quandary where there doesn't seem to be an easy solution. This book presents positive ethics as a means to overcome such ethical challenges. The positive approach focuses on not just avoiding negative consequences, but reaching the best possible outcomes for both the psychotherapist and the client. The authors outline a clear decision-making process that is based on three practical strategies: the ethics acculturation model to help therapists incorporate personal ethics into their professional roles, the quality enhancement model for dealing with high-risk patients who are potentially harmful, and ethical choice-making strategies to make the most ethical decision in a situation where two

ethical principles conflict. Throughout the decision-making process, psychotherapists are encouraged to follow four basic guidelines: Focus on overarching ethical principles Consider intuitive, emotional, and other nonrational factors Accept that some problems have elusive solutions Solicit input from colleagues and consultation groups Numerous vignettes illustrate how to apply positive ethics to many different ethical challenges that psychotherapists will likely encounter in practice.

Are Workarounds Ethical? Aug 28 2019 Should you wash your hands? -- Are workarounds ethical? -- Turfing, bending, and gaming -- Dirty hands and the semiclear conscience -- Problems of humanity -- Ethics without heroics : foreseeing moral problems in complex systems

Application of Ethical Decision-Making to Nursing Practice Feb 01 2020 Designed specifically for the educational needs of RN to BSN students This is a unique, innovative professional nursing ethics textbook designed specifically for the educational needs of RN to BSN students. Written by experts in the field, it discusses ethical concepts geared to the licensed nurse who has spent several years in practice but is learning high-level concepts and applications. The text addresses different areas of professional practice and is rich with case studies illustrating clinical scenarios involving ethical awareness and decision-making. The book fulfills the necessary criteria for the AACN Essentials for Baccalaureate Education and the QSEN and ISOM competencies. Clear and concise, the text relates content to the nurse's current practice and professional development without extraneous information typically included in other texts. Progressing from simple to complex, chapters build on previous practice experience to focus on ethical decision-making in a variety of practice environments. The book incorporates a "four boxes" decision-making model and addresses essential communication skills, how to recognize and resolve moral distress, and the role of an ethics committee. It discusses common ethical issues likely to be encountered and ethical practice as it relates to quality and safety. Case Study Dilemmas that include evidence-based research provide the opportunity to apply ethical decision-making principles. QSEN application principles are also featured in each chapter, and interactive exercises and questions and PowerPoints provide further opportunity for critical thinking. Key Features: Addresses the specific needs of students in the RN to BSN course Fulfills AACN Essentials, IOM Competencies, and QSEN KSAs Builds upon previous practice experience of RN to BSN students Discusses ethical decision-making in a variety of practice environments Includes Case Study Dilemmas to apply ethical decision-making principles

Taking Action Against Clinician Burnout Apr 04 2020 Patient-centered, high-quality health care relies on the well-being, health, and safety of health care clinicians. However, alarmingly high rates of clinician burnout in the United States are detrimental to the quality of care being provided, harmful to individuals in the workforce, and costly. It is important to take a systemic approach to address burnout that focuses on the structure, organization, and culture of health care. Taking Action Against Clinician Burnout: A Systems Approach to Professional Well-Being builds upon two groundbreaking reports from the past twenty years, To Err Is Human: Building a Safer Health System and Crossing the Quality Chasm: A New Health System for the 21st Century, which both called attention to the issues around patient safety and quality of care. This report explores the extent, consequences, and contributing factors of clinician burnout and provides a framework for a systems approach to clinician burnout and professional well-being, a research agenda to advance clinician well-being, and recommendations for the field.

Nursing Ethics Jul 28 2019 "Nursing ethics : across the curriculum and into practice, fourth edition prepares students and professionals for the moral issues encountered in nursing practice. Healthcare ethics is constantly evolving to keep pace with new issues as they arise, as well as new policies and laws. The fourth edition has been completely revised to reflect the evolution of nursing ethics within health care. Updated case studies, research, and legal perspectives, as well as the 2015 American Nurses Association's Code of ethics, offer students and practitioners a wealth of current knowledge."--Page 4 de la couverture.

Bioethical Decision Making in Nursing, Fifth Edition Jul 20 2021 Named a 2013 Doody's Core Title! "This book provides a systematic approach to bioethical decision making, a process that can help clarify situations where right and wrong are not clearly defined. This [is] a valuable book for ethics and theory courses." Score: 100, 5 stars --Doody's More relevant today than ever, Husted and Husted's classic nursing ethics text provides a practical framework to help nurses engage with patients to make difficult ethical decisions. It delivers a systematic approach to bioethical decision-making that can help clarify situations

where "right" and "wrong" are not clearly defined. An abundance of case studies provide practice in bioethical decision-making, with nearly 60 bioethical dilemmas analyzed in detail. The fifth edition has been reorganized and rewritten to facilitate increased readability and to engage readers more fully in learning. It includes two new chapters, Moral Distress and Bioethical Decision Making in Nursing, additional case studies, and abundant tables, diagrams and graphics that reinforce the text discussion. The book is grounded in the concept of "Symphonia" which, within the health care arena, is the study of agreements between health care professionals and patients and the ethical implications of these agreements. It is intended promote the welfare of both patient and health care provider. The new chapter on Moral Distress offers coping techniques for situations in which a nurse has an ethical issue with a standard of care but is powerless to change that care; the new chapter on Intersections Between Legal and Bioethical Decision Making in Nursing focuses on situations that an be interpreted as either moral and illegal or immoral and legal. The fifth edition also features a new section on ethical colleagueship, providing support to relieve common dilemmas among health care professionals. An updated digital teacher's manual provides chapter summaries, major focus areas, a wealth of classroom activities, PowerPoint slides, resolution for cases that are unresolved in the text, and a test bank. New to the Fifth Edition: Reorganized and rewritten for ease of comprehension and increased reader engagement Includes new chapters on Moral Distress and Bioethical Decision Making in Nursing Provides more tables, diagrams, and graphics to clarify text discussion Delivers new case studies that are analyzed in depth Addresses ethical colleagueship

Role Interference and Moral Distress in the Subjective Experience of Deep Undercover Law Enforcement Operatives Nov 11 2020

Irritation and Moral Distress Among Nursing Students Dec 25 2021 "The wealth of a nation is its working people"- so goes the saying. Work brings wealth. We spend an average of 25% of our lives at work, so it's important to make the best out of it. Working was never an easy task, since; the workplace is dynamic in nature and complex in its function. Dynamic because it involves people who are motivated emotionally. Complex because people may differ emotionally giving an opportunity for a conflict. Organizations are complex social systems that sometimes perform remarkably well and sometimes fail miserably (Jex 2002). The diversity in work makes an organization complex, in which the people who work together differ from each other on all sorts of dimensions. Diversity in work place has a positive effect as every opinion of the workers contributes to the innovations and creativity. Diversity can create stress and conflict and can make everyone- those who are privileged as well as those who are less privileged - anxious and upset (Crosby, Stockdale 2004). Work place is characterized by demands, interpersonal communications, and work pressures that may lead to detriment of health and personal life. The ever-increasing demands of workloads and deadlines, with massive technological change, with internationalization of work and the changing nature of the family (i.e., two-earner couples), make the workplace itself a health issue (Cooper, Schabracq, Winnubst 2003). The organizations in which people work affect their thoughts, feelings, and actions in the workplace and away from it (Brief, Weiss 2002). Working conditions, working environments and other organizational life, produce work-related stress that influences the health of the worker. Their stress is reflected in physical symptoms,

Shared Trauma, Shared Resilience During a Pandemic Oct 11 2020 This contributed volume reflects on the collective wisdom and ongoing efforts of the social work profession that has been in the forefront of the global pandemic of COVID-19. The contributors are seasoned social work academics, practitioners, administrators, and researchers. Working on the frontlines with patients and families, these social workers have garnered experiences and insights, and also have developed innovative ways to mitigate the impact of the coronavirus on the psychosocial well-being of their clients and themselves. The 36 reflections, experiences, and insights in this curated collection address the behavioral, mental health, socioeconomic, and other repercussions of the coronavirus pandemic that have impacted their client base, most of whom are vulnerable populations: Repurposed, Reassigned, Redeployed Safety Planning with Survivors of Domestic Violence: How COVID-19 Shifts the Focus COVID-19 and Moral Distress/Moral Anguish Therapeutic Support for Healthcare Workers in Acute Care: Our Voice Shared Trauma and Harm Reduction in the Time of COVID-19 Wholeheartedness in the Treatment of Shared Trauma: Special Considerations During the COVID-19 Pandemic The Role of Ecosocial Work During the COVID-19 Pandemic: The Natural

World Black Lives, Mass Incarceration, and the Perpetuity of Trauma in the Era of COVID-19: The Road to Abolition Social Work Teaching Social Work Practice in the Shared Trauma of a Global Pandemic The COVID-19 Self-Care Survival Guide: A Framework for Clinicians to Categorize and Utilize Self-Care Strategies and Practices Shared Trauma, Shared Resilience During a Pandemic: Social Work in the Time of COVID-19 is an early and essential work on the impact of the pandemic on the social work field with useful practice wisdom for a broad audience. It can be assigned in masters-level social work practice and elective courses on trauma, as well as inform both neophyte and experienced practitioners. It also would appeal to the general public interested in the work of social workers during a pandemic.

Moral Resilience Jan 26 2022 Suffering is an unavoidable reality in health care. Not only are patients and families suffering but also the clinicians who care for them. Commonly the suffering experienced by clinicians is moral in nature, in part a reflection of the increasing complexity of health care, their roles within it, and the expanding range of available interventions. Moral suffering is the anguish that occurs when the burdens of treatment appear to outweigh the benefits; scarce human and material resources must be allocated; informed consent is incomplete or inadequate; or there are disagreements about goals of treatment among patients, families or clinicians. Each is a source of moral adversity that challenges clinicians' integrity: the inner harmony that arises when their essential values and commitments are aligned with their choices and actions. If moral suffering is unrelieved it can lead to disengagement, burnout, and undermine the quality of clinical care. The most studied response to moral adversity is moral distress. The sources and sequelae of moral distress, one type of moral suffering, have been documented among clinicians across specialties. It is vital to shift the focus to solutions and to expanded individual and system strategies that mitigate the detrimental effects of moral suffering. Moral resilience, the capacity of an individual to restore or sustain integrity in response to moral adversity, offers a path forward. It encompasses capacities aimed at developing self-regulation and self-awareness, buoyancy, moral efficacy, self-stewardship and ultimately personal and relational integrity. Clinicians and healthcare organizations must work together to transform moral suffering by cultivating the individual capacities for moral resilience and designing a new architecture to support ethical practice. Used worldwide for scalable and sustainable change, the Conscious Full Spectrum approach, offers a method to solve problems to support integrity, shift patterns that undermine moral resilience and ethical practice, and source the inner potential of clinicians and leaders to produce meaningful and sustainable results that benefit all.

Nursing Practice Apr 28 2022

Professional Moral Courage in Nurse Executive Leadership Jul 08 2020 Helps nurse executives ethically navigate the unique challenges and moral dilemmas of healthcare This unique text is the first to introduce professional moral courage as an essential competency in nurse executive leadership. It provides a foundation and understanding of the role of professional moral courage in nursing practice, places it in the context of current healthcare challenges and dilemmas, and identifies the characteristics and qualities required to lead in such situations. Authored by a seasoned nurse executive, the text begins with an overview of the healthcare environment; roles, responsibilities, and challenges of the nurse executive; and ethical dimensions of nurse executive practice. It then introduces the construct of professional moral courage, establishes a supporting competency framework, delineates a measurement tool, and provides guidance on how a nurse executive can develop and nurture this vital competency. Chapters provide real-world scenarios that highlight professional moral courage in action and its related consequences. Key Features: Provides a foundation in professional moral courage and describes why it is important to the nurse executive role Examines the impact of current healthcare challenges, as well as moral and ethical dilemmas in nurse executive leadership Establishes professional moral courage as a critical leadership competency and provides a supporting framework and measurement tool Guides nurse executives in the development and cultivation of professional moral courage Purchase includes digital access for use on most mobile devices or computers

The Moral Distress Syndrome Affecting Physicians Mar 28 2022 This book raises awareness of moral distress syndrome in the healthcare industry. Presented in a business novel format, it describes a Grand Rounds with a magistral lecture, a format familiar to physicians, where the audience asks questions pertaining to this syndrome and the instructor provides answers.

Essentials of Nursing Law and Ethics Apr 16 2021 An Updated and Authoritative Resource on Nursing Law and Ethics The Essentials of Nursing Law and Ethics, Second Edition focuses on the legal aspect of Nursing as it relates to patient safety and quality, environmental health and safety, error reduction and ethical boundaries of practice. Other timely topics include the appropriate use of social media by nursing staff. The text is written by a nurse attorney who presents complex topics in an understandable manner while providing accurate and well researched content relevant to the practice. Extensive legal research by the author incorporates the most current relevant professional and legal references including case law. The text is uniquely organized into five major sections including: the law and nursing practice; liability in patient care; documentation issues; employment and the workplace; and ethics. New to this Edition: • Professional boundaries and use of social media • Quality and safety initiatives in nursing practice, including Quality and Safety Education for Nurses (QSEN) concepts and content, Institute of Medicine (IOM) recommendations • Environmental health and safety, including equipment safety • Staffing issues and implications for patient safety and liability • Workplace issues including factors to consider when accepting assignments, horizontal violence • Additional coverage on medication error reduction and safety initiatives • Updated content on electronic documentation, communication, and recordkeeping • Regulatory processes including state board use of off duty conduct in disciplinary proceedings, and data bank reporting, and remediation as an alternative to discipline • Expansion of content on ethical considerations in areas such as assisted suicide, patients' rights, and applying the ANA Code of Ethics for Nurses • Moral distress and moral courage in ethical decision making • Update on the processes for basic legal research Key Features: Test bank featuring NCLEX type questions and rationale A glossary of legal terminology found within the text A Table of Cases for easier access to case law Expanded online resources and scholarly references included at the end of each chapter

Code of Ethics for Nurses with Interpretive Statements Nov 23 2021 Pamphlet is a succinct statement of the ethical obligations and duties of individuals who enter the nursing profession, the profession's nonnegotiable ethical standard, and an expression of nursing's own understanding of its commitment to society. Provides a framework for nurses to use in ethical analysis and decision-making.

Nurse Staffing 101 Sep 29 2019 Nurses are often required to work long hours and night shifts. Increased workloads often lead to job-related burnout, job dissatisfaction, and increased risk for patient safety. As a nurse manager or charge nurse you are challenged with achieving appropriate levels of nurse staffing to achieve quality outcomes. ANA's new Nurse Staffing 101: A Decision-making Guide for the RN contains tools to help you develop effective and facility-specific approaches to optimal staffing decisions and plans. It covers the essential topics: Historical and political setting of safe staffing Workplace, safety, and quality considerations Examples of professional nursing practice models Staffing at the organizational level in terms of workload variances Current practices and possible solutions for determining and achieving the requisite staffing levels and measureable quality outcomes As an added bonus, the guide contains a handy summary checklist, based on ANA's Principles for Nurse Staffing (2012) to assist with the decision making process.

Clinical Ethics on Film Jan 02 2020 This book discusses feature films that enrich our understanding of doctor-patient dilemmas. The book comprises general clinical ethics themes and principles and is written in accessible language. Each theme is discussed and illuminated in chapters devoted to a particular film. Chapters start with a discussion of the film itself, which shares details behind the making of the film; box-office and critical reception; casting; and other facts about production. The chapter then situates the film in a history of medicine and medical sociology context before it delves into the clinical ethics issues in the film, and how to use it as a teaching aid for clinical ethics. Readers will understand how each film in this collection served to bring particular clinical ethics issues to the public's attention or reflected medico-legal issues that were part of the public discourse. The book is a perfect instructor's guide for anyone teaching bioethics, healthcare ethics, medical sociology, medical history, healthcare systems, narrative medicine, or nursing ethics.

Ethical Dimensions in the Health Professions Feb 24 2022 Learn to recognize, understand, and resolve ethical problems in the workplace with Ethical Dimensions in the Health Professions, 6th Edition. Ideal for all practicing and aspiring healthcare professionals, this unique text gives readers a solid foundation in basic ethical theory, the terms and concepts of ethics, and the numerous ethical issues surrounding health care today. The new sixth edition centers on the six-step decision-making process and includes expanded patient case studies and an increased emphasis on working within inter-professional care teams toward the resolution of ethical problems. With all of its tools and guidance, Ethical Dimensions gives readers the framework needed to make ethical and effective choices in the workplace. UNIQUE! Process of ethical decision-making provides readers with an organizing framework to use in making the best decisions in the face of ethical problems. Reflection boxes highlight important concepts and stimulate critical thinking. Patient stories depict real-life situations and demonstrate the ethical decision-making process. Summary boxes offer a quick review of the important information in each section. Content on current laws and institutional policies make readers aware of their legal responsibilities as well as their ethical ones. Questions for thought and discussion encourage readers to apply the ethical decision-making process to different situations. NEW! Expanded patient stories include current innovations and issues in ethics. NEW! Additional content on interprofessional team decision-making reflects an important expanding movement in healthcare nationally and internationally.

Moral Distress and Injury in Human Services Sep 02 2022 "Moral injury is defined as the sort of harm that results when someone has perpetrated, failed to prevent, or witnessed acts that transgress deeply held moral beliefs. Social workers and other human services professionals are well versed in the ravages, symptoms, and treatment of the complicated forms of posttraumatic stress that accompany moral injury, and the issue has been gaining attention. The purpose of this book is to provide in-depth discussion of the concepts of moral injury, moral distress, and moral demoralization; common causes; the ways in which moral injury, moral distress, and moral demoralization are manifested; the causes of moral injury, moral distress, and moral demoralization; secondary trauma, including the ways in which moral injury, moral distress, and moral demoralization affect practitioners; ethical/moral dilemmas; prevention strategies; the role of advocacy and moral courage; and practitioner self-care and resilience. The book includes extensive case examples (clinical, administration, policy practice, advocacy) drawn from the author's experience in and consultation with practitioners employed in public welfare offices, mental health agencies (residential and nonresidential), child and family services programs (residential and nonresidential), substance use programs (residential and nonresidential), housing and homelessness programs, prisons, schools, hospitals, military settings, private/independent practice, immigration and refugee resettlement programs, nursing homes, HIV/AIDS programs, disabilities services programs, hospice programs, and parole/probation offices, among others"--
