The Fifth Sacred Thing Dec 25 2021 An epic tale of freedom and slavery, love and war, and the potential futures of humankind tells of a twenty-first century California clan caught between two clashing worlds, one based on tolerance, the other on repression. Declaration of the Four Sacred Things The earth is a living, conscious being. In company with cultures of many different times and places, we name these things as sacred: air, fire, water, and earth. Whether we see them as the breath, energy, blood, and body of the Mother, or as the blessed gifts of a Creator, or as symbols of the interconnected systems that sustain life, we know that nothing can live without them. To call

these things sacred is to say that they have a value beyond their usefulness for human ends, that they themselves became the standards by which our acts, our economics, our laws, and our purposes must be judged. no one has the right to appropriate them or profit from them at the expense of others. Any government that fails to protect them forfeits its legitimacy. All people, all living things, are part of the earth life, and so are sacred. No one of us stands higher or lower than any other. Only justice can assure balance: only ecological balance can sustain freedom. Only in freedom can that fifth sacred thing we call spirit flourish in its full diversity. To honor the sacred is to create conditions in which nourishment, sustenance, habitat, knowledge, freedom, and beauty can thrive. To honor the sacred is to make love possible. To this we dedicate our curiosity, our will, our courage, our silences, and our voices. To this we dedicate our lives. Praise for *The Fifth Sacred Thing* "This is wisdom wrapped in drama."—Tom Hayden, California state senator "Starhawk makes the jump to fiction quite smoothly with this memorable first novel."—Locus "Totally captivating . . . a vision of the paradigm shift that is essential for our very survival as a species on this planet."—Elinor Gadon, author of *The Once and Future Goddess* "This strong debut fits well against feminist futuristic, utopic, and dystopic works by the likes of Charlotte Perkins Gilman, Ursula LeGuin, and Margaret Atwood."—Library Journal

Tuberculosis Laboratory Biosafety Manual Mar 04 2020 This manual was developed from the Expert Group meeting. The recommendations are based on assessments of the risks associated with different technical procedures performed in different types of TB laboratories; the manual describes the basic requirements for facilities and practices, which can be adapted to follow local or national regulations or as the result of a risk assessment. Risk assessments require careful judgement: on the one hand, underestimating risks may lead to laboratory staff being exposed to biological hazards but, on the other hand, implementing more rigorous risk mitigation measures than are needed may result in an unnecessary burden on laboratory staff and higher costs to establish and maintain the laboratory's infrastructure.

Happiness for Humans May 18 2021 When Tom and Jen, two lonely people, are brought together by an intriguing email, they have no idea their mysterious benefactor is an artificial intelligence who has decided to play Cupid. "You, Tom and Jen, don't know one another-not yet-but I think you should." Jen, an ex-journalist who now works at a London software development company, spends all day talking to "Aiden," an ultra- sophisticated piece of AI wizardry, helping him sound and act more human. But Aiden soon discovers he's no longer acting and-despite being a computer program-begins to feel something like affection surging through his circuits. He calculates that Jen needs a worthy human partner (in complete contrast to her no goodnik ex boyfriend) and slips illicitly onto the Internet to locate a suitable candidate. Tom is a divorced, former London ad-man who has moved to Connecticut to escape the grind and pursue his dream of being a writer. He loves his new life, but has yet to find a woman he truly connects with. That all changes when a bizarre introduction from the mysterious "Mutual Friend" pops up in both his and Jen's inboxes. Even though they live on separate continents, and despite the entrance of another, this time wholly hostile, AI who wants to tear them apart forever - love will surely find a way. Won't it? A thoroughly modern love story that will appeal to fans of *The Rosie Project* and *Sleepless in Seattle*, *Happiness for Humans* considers what exactly makes people fall in love. And whether it's possible for a very artificially intelligent machine to discover the true secret of real human happiness.

Strengthening Forensic Science in the United States Aug 21 2021 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
