Nation, Diaspora, Trans-nation Nov 16 2021 A premier debate in the present conjuncture of globalization has been the prospect of ' post nation ' and the obsolescence of patriotism at the horizon of transnationalism. In an ethnographically rich and discursively sharp intervention R. K. Jain articulates the contribution that diaspora studies can make to this debate. In this anthropological narrative both nation and trans-nation are ' moving targets ' ; their positionality shifts and changes according to the geo-political location of the analyst and the frame of comparison brought to bear on the objects/subjects of study. In Jain ' s case the locus happens to be India but the discussion in this book does not foreclose perspectives from ' other ' nations. Indeed as his own examples from countries of the Indian Ocean zone, the Asia Pacific region and the Caribbean amply demonstrate the methodology of ethno-cultural relativism built in these diasporic comparisons is the surest guarantee for tracing the juxtaposed dialectic of nation and trans-nation from whichever existential location one begins. The rootedness of this particular discourse in India provides coherence in the nature of a case-study of globalization from a prominent diaspora node of our times. At the same time it unravels dimensions of Indian social institutions viewed from the vantage point of diaspora. The book, therefore, is an invitation to further multi-disciplinary and multi-sited collaboration in the exploration of globalization, diaspora, nationalism and patriotism as well as transnationalism from diverse perspectives.

Patent Law Sep 21 2019 It is a casebook on patent law that involves comparative jurisprudence tailored for India. The book is best described by highlighting the following features: (1) Casebook format - The casebook format suits practitioners and judges. It allows the reader to independently interpret and assess the implication of each caselaw, which forms a vital component of the practice of law. The reader is assisted towards this objective by only containing extracts of the relevant portions of the judgment. Even from an academic perspective, it provides an unfiltered view of the law, better than any unnecessary prose. (2) Comparative approach - For each topic of patent law, the book would provide a single point congregation of the relevant Indian provisions and extracts from relevant caselaw across India, the UK, the EU and the USA. This approach is ideal for India, where jurisprudence on the subject is limited. Courts, practitioners, and the Patent Office often resort to such a comparative approach to learn from the experiences of other jurisdictions. (3) Notes - Author's notes before and after each caselaw or topic fulfill four purposes: (i) set the context for the reader; (ii) critique the caselaw or to bring focus on to issues that arise in practice; (iii) contextualize the discussion to the Indian statute; and (iv) examine the historical perspective, including the legislative history. (4) Focus on law - it is a no-nonsense, no-rhetoric book, focussing on the law, its interpretation and application. Income Tax Law and Accounts Jul 12 2021 Who can buy?
