**Bio-Age** Jun 04 2020 How Young Do You Want to Feel? Your calendar age is just a number. What really matters is how you look, how you feel and how much energy you bring to your day. Your biological age— your Bio-Age— is what counts. You can't make yourself younger chronologically (be honest now, do you really want to be 15 again?) but you can change your Bio-Age. We all know people who look and perform like someone 10 years older than the age on their birth certificate. We also know others who seem to be at least 10 years younger. What are their secrets? Brad King and Dr. Michael Schmidt shed some light on that question. The authors of Bio-Age have brought together the most up-to-date research on how the human body works and how it ages— a complex subject that has exploded with new discoveries in recent years. They explain what is actually happening to your body. Eight other experts, invited to contribute their news and views on aging-related topics, will tell you about specific anti-aging strategies. Then the authors take it to the next level with a 10-step plan to help you change your own aging process and promote healthy longevity. Read the book. Make the lifestyle choices that will keep you on the move and on the ball. Don't let your birth certificate fool you— how young do you want to feel?

**Coming of Age in the Baby Boom** Sep 27 2019 Part autobiography and part social history. COMING OF AGE IN THE BABY BOOM tells the story of a white, middle-class, privileged youth embodying the contradictions of growing up in post-War America. --As a boy he won two citizenship medals from the American Legion; as a youth he was chased by Legionnaires down the main street of his home town for organizing against the War in Vietnam. --Growing up he had little or no contact with minorities, but he became deeply involved in the civil rights movement, including participation in the 1964 Mississippi Freedom Summer.--He was an Eagle Scout and Assistant Scoutmaster who experimented with a variety of illicit drugs.--He moved to the Adirondack Mountains to live like Thoreau, in a cabin in the woods without phone or electricity, and ended up owning and managing several grand, rustic estates of Alfred Vanderbilt, J. Pierpont Morgan, and others icons of the Gilded Age. --He was raised in Judaism, became an agnostic, had a mystical experience, and forged his own spiritual integration.--He loved his strong, moralistic father; then hated him; then in archetypal fashion both learned to love and accept one another.--His early relationships with girls and women were desperate, selfish, and patriarchal; then gradually he became a thoughtful and egalitarian partner and lover. --His self-concept was that of an anti-Establishment outsider, yet he initiated and co-led a successful effort to amend New York State's constitution. Along the way toward reconciling such contradictions, he wrote some twenty-five books; became a leader in education, counseling and historic preservation; debated Moral Majority leader Rev. Jerry Falwell before an audience of 2000 people; was interviewed by Phil Donahue on the Today Show; ran the New York City Marathon; hiked the 46 High Peaks of the Adirondacks, and raised a family. Told with disarming honesty, psychological insight and humor, Kirschenbaum's personal story is in

many ways the story of America in the mid to late twentieth century. He experienced the universal dramas and dilemmas of finding himself, developing mature relationships, and attaining meaning in a tumultuous period of cultural change. The narrative's themes, whether personal, social or political, resonate strongly today.

**Coming of Age in Second Life** Sep 19 2021 Millions of people around the world today spend portions of their lives in online virtual worlds. Second Life is one of the largest of these virtual worlds. The residents of Second Life create communities, buy property and build homes, go to concerts, meet in bars, attend weddings and religious services, buy and sell virtual goods and services, find friendship, fall in love--the possibilities are endless, and all encountered through a computer screen. At the time of its initial publication in 2008, *Coming of Age in Second Life* was the first book of anthropology to examine this thriving alternate universe. Tom Boellstorff conducted more than two years of fieldwork in Second Life, living among and observing its residents in exactly the same way anthropologists traditionally have done to learn about cultures and social groups in the so-called real world. He conducted his research as the avatar "Tom Bukowski," and applied the rigorous methods of anthropology to study many facets of this new frontier of human life, including issues of gender, race, sex, money, conflict and antisocial behavior, the construction of place and time, and the interplay of self and group. *Coming of Age in Second Life* shows how virtual worlds can change ideas about identity and society. Bringing anthropology into territory never before studied, this book demonstrates that in some ways humans have always been virtual, and that virtual worlds in all their rich complexity build upon a human capacity for culture that is as old as humanity itself. Now with a new preface in which the author places his book in light of the most recent transformations in online culture, *Coming of Age in Second Life* remains the classic ethnography of virtual worlds.

**Come of Age** Jul 18 2021 In his landmark provocative style, Stephen Jenkinson makes the case that we must birth a new generation of elders, one poised and willing to be true stewards of the planet and its species. *Come of Age* does not offer tips on how to be a better senior citizen or how to be kinder to our elders. Rather, with lyrical prose and incisive insight, Stephen Jenkinson explores the great paradox of elderhood in North America: how we are awash in the aged and yet somehow lacking in wisdom; how we relegate senior citizens to the corner of the house while simultaneously heralding them as sage elders simply by virtue of their age. Our own unreconciled relationship with what it means to be an elder has yielded a culture nearly bereft of them. Meanwhile, the planet boils, and the younger generation boils with anger over being left an environment and sociopolitical landscape deeply scarred and broken. Taking on the sacred cow of the family, Jenkinson argues that elderhood is a function rather than an identity—it is not a position earned simply by the number of years on the planet or the title "parent" or "grandparent." As with his seminal book *Die Wise*, Jenkinson interweaves rich personal stories with iconoclastic observations that will leave readers radically rethinking their concept of what it takes to be an elder and the risks of doing otherwise. Part critique, part call to action, *Come of Age* is a love song inviting us—imploing us—to elderhood in this time of trouble. That time is now. We're an hour before dawn, and first light will show the carnage, or the courage, we bequeath to the generations to come.

**Age at Work** Jun 28 2022 Age at Work explores the myriad ways in which 'age' is at 'work' across society, organizations and workplaces, with special focus on organizations, their boundaries, and marginalizing processes around age and ageism in and across these spaces. Enriched with insights from the authors' lived experiences, Age at Work is a major and timely intervention in studies of age, work, care and organizations. Ideal for students of Sociology, Organizations and Management, Social Policy, Gerontology, Health and Social Care, and Social Work.

**The Palgrave Handbook of Age Diversity and Work** Dec 31 2019 This Handbook incorporates a variety of disciplines and approaches in order to provide a comprehensive and authoritative examination of the issues that result from increasing age diversity at work. Despite interest in this area exploding over the past few years amongst academics, practitioners and policy makers, the analysis of age diversity has remained primarily within disciplinary 'silos' such as Psychology or Sociology with a focus on ageing or generational differences, rather than a combination of approaches to understanding age diversity. Unique in its coverage of multiple perspectives, it considers not only generational and ageing perspectives to age diversity, but also highlights the importance of context in driving both the impact and response to this issue. The Palgrave Handbook of Age Diversity and Work includes contributions from leading scholars in age and generational diversity from across the world, discussing cutting-edge research findings about the nature and impact of age diversity and presenting approaches to managing this phenomenon.

*Strontium Retention as a Function of Age in the Dog* Nov 09 2020  
*Coming of Age in the Other America* May 28 2022 Recent research on inequality and poverty has shown that those born into low-income families, especially African Americans, still have difficulty entering the middle class, in part because of the disadvantages they experience living in more dangerous neighborhoods, going to inferior public schools, and persistent racial inequality. *Coming of Age in the Other America* shows that despite overwhelming odds, some disadvantaged urban youth do achieve upward mobility. Drawing from ten years of fieldwork with parents and children who resided in Baltimore public housing, sociologists Stefanie DeLuca, Susan Clampet-Lundquist, and Kathryn Edin highlight the remarkable resiliency of some of the youth who hailed from the nation's poorest neighborhoods and show how the right public policies might help break the cycle of disadvantage. *Coming of Age in the Other America* illuminates the profound effects of neighborhoods on impoverished families. The authors conducted in-depth interviews and fieldwork with 150 young adults, and found that those who had been able to move to better neighborhoods—either as part of the Moving to Opportunity program or by other means—achieved much higher rates of high school completion and college enrollment than their parents. About half the youth surveyed reported being motivated by an "identity project"—or a strong passion such as music, art, or a dream job—to finish school and build a career. Yet the authors also found troubling evidence that some of the most promising young adults often fell short of their goals and remained mired in poverty. Factors such as neighborhood violence and family trauma put these youth on expedited paths to adulthood, forcing them to shorten or end their schooling and find jobs much earlier than their middle-class counterparts. Weak labor markets and subpar postsecondary educational institutions, including exploitative for-profit trade schools and under-funded community colleges, saddle some young adults with debt and trap them in low-wage jobs. A third of the youth surveyed—particularly those who had not developed identity projects—were neither employed nor in school. To address these barriers to success, the authors recommend initiatives that help transform poor neighborhoods and provide institutional support for the identity projects

that motivate youth to stay in school. They propose increased regulation of for-profit schools and increased college resources for low-income high school students. *Coming of Age in the Other America* presents a sensitive, nuanced account of how a generation of ambitious but underprivileged young Baltimoreans has struggled to succeed. It both challenges long-held myths about inner-city youth and shows how the process of "social reproduction"—where children end up stuck in the same place as their parents—is far from inevitable.

**The Age of the Garden** Mar 02 2020 For the most part, the first five books of the Bible are glossed over. The basic information is noted and we move on. However, when I was teaching in the State prisons, I decided to use these books at times to explain the beginning of things. In this present time, it appears that answers are popping up that want to explain these books. These books are the motive for the Bible. They satisfy God's plan for Why. That is the intention here. The Why of it all. From the smallest to the Greatest, there is always a Motive.

**Coming of Age on Zoloft** Feb 10 2021 A compelling and troubling exploration of a generation raised on antidepressants, and a book that combines expansive interviews with substantive research-based reporting, *Coming of Age on Zoloft* is a vitally important and immediately engrossing study of one of America's most pressing and omnipresent issues: our growing reliance on prescription drugs. Katherine Sharpe, the former editor of *Seed* magazine's ScienceBlogs.com, addresses the questions that millions of young men and women are struggling with. "Where does my personality end and my prescription begin?" "Do I have a disease?" "Can I get better on my own?" Combining stout scientific acumen with first-person experience gained through her own struggle with antidepressants, Sharpe leads the reader through a complex subject, a guide towards a clearer future for all.

*Coming of Age in Mississippi* Jul 30 2022 The unforgettable memoir of a woman at the front lines of the civil rights movement—a harrowing account of black life in the rural South and a powerful affirmation of one person's ability to affect change. "Anne Moody's autobiography is an eloquent, moving testimonial to her courage."—Chicago Tribune Born to a poor couple who were tenant farmers on a plantation in Mississippi, Anne Moody lived through some of the most dangerous days of the pre-civil rights era in the South. The week before she began high school came the news of Emmet Till's lynching. Before then, she had "known the fear of hunger, hell, and the Devil. But now there was . . . the fear of being killed just because I was black." In that moment was born the passion for freedom and justice that would change her life. A straight-A student who realized her dream of going to college when she won a basketball scholarship, she finally dared to join the NAACP in her junior year. Through the NAACP and later through CORE and SNCC, she experienced firsthand the demonstrations and sit-ins that were the mainstay of the civil rights movement—and the arrests and jailings, the shotguns, fire hoses, police dogs, billy clubs, and deadly force that were used to destroy it. A deeply personal story but also a portrait of a turning point in our nation's destiny, this autobiography lets us see history in the making, through the eyes of one of the footsoldiers in the civil rights movement. Praise for *Coming of Age in Mississippi* "A history of our time, seen from the bottom up, through the eyes of someone who decided for herself that things had to be changed . . . a timely reminder that we cannot now relax."—Senator Edward Kennedy, *The New York Times* Book Review "Something is new here . . . rural southern black life begins to speak. It hits the page like a natural force, crude and undeniable and, against all principles of beauty, beautiful."—*The Nation* "Engrossing, sensitive, beautiful . . . so candid, so honest, and so touching, as to make it virtually impossible to put down."—San Francisco Sun-Reporter  
*The Stages of Age* Oct 28 2019 A first-of-its-kind study that explores the intersections of performance and aging. Playwright and scholar Anne Davis Basting explores both aging actors and aging AS acting in a cross-

section of American theatrical representations that hope to catalyze shifts in our understanding of age. Illustrations.

**How to Age** Nov 02 2022 THE SCHOOL OF LIFE IS DEDICATED TO EXPLORING LIFE'S BIG QUESTIONS IN HIGHLY-PORTABLE PAPERBACKS, FEATURING FRENCH FLAPS AND DECKLE EDGES, THAT THE NEW YORK TIMES CALLS "DAMNABLY CUTE." WE DON'T HAVE ALL THE ANSWERS, BUT WE WILL DIRECT YOU TOWARDS A VARIETY OF USEFUL IDEAS THAT ARE GUARANTEED TO STIMULATE, PROVOKE, AND CONSOLE. Society has a deep fear of ageing, and showing your age is increasingly one of our most pervasive taboos. Old age in modern life is widely viewed as either a time of inevitable decline or something to be resisted, denied or overcome. In *How to Age*, sociologist and award-winning journalist Anne Karpf urges us to radically change our narrative. Exploring how our outlook on ageing is historically determined and culturally defined, Karpf draws upon revealing case studies to suggest how ageing can be an actively enriching time of immense growth. She argues that if we can recognize growing older as an inevitable part of the human condition, then the great challenge of ageing turns out to be none other than the challenge of living. In *How to Age*, learn how ageing isn't about your wardrobe or physical fitness, but a determination to live fully at every age and stage of life.

#### **The Effects of Equipment Age on Mission Critical Failure Rates**

May 04 2020 Military budget limits in the late 1990s and the timeline for the Army's next generation of weapon systems have resulted in the aging of many of the Army's fleets and projected extensions in their service lives. There is a widespread belief that the increases in fleet age will create readiness and cost problems. The Army is executing recapitalization programs to rebuild or upgrade selected weapon systems in order to retain combat capabilities and hold down maintenance costs. To aid in that effort, this research assesses the effects of age on mission-critical failure rates for M1 Abrams tanks. Results suggest that tank age is a significant predictor of M1 mission-critical failures, as are usage and location. The aging effect is estimated at a 3 to 7 percent increase in tank failures per year of age, about a doubling of the failure rate, over the first 14 years of a tank's life. The magnitude and pattern of aging effects were found to differ across tank subsystems, revealing that a distinct subset of components contributes to the aging effects. These parts are the best candidates for replacement with like components in rebuild efforts. Other components emerge as readiness and/or cost drivers, whether or not a tank is new or old, indicating the need for reliability upgrade initiatives rather than simple replacement with new parts. These findings should help quantify the value of Abrams recapitalization efforts and suggest potential subsystems to target in those efforts with regard to both rebuild and upgrade.

**From Age to Age** Jul 26 2019 2009 Catholic Press Association Award Winner! From age to age you gather a people to yourself, so that from east to west a perfect offering may be made to the glory of your name." Eucharist is the fullest expression of our life with God, a life we share with Christians throughout the ages. It is also a sensory experience, engaging us in the sights and sounds, tastes and touch of the worship. Edward Foley's revised and expanded *From Age to Age* draws readers into that sensory experience. He traces the development of Christian Eucharist from its Jewish roots to our own time. In addition to exploring the architecture, music, books, and vessels that contributed to each period's liturgical expressions, this edition introduces readers to the theology of each age as well as the historical and cultural contexts that shaped the Eucharist. Richly illustrated with numerous images and quotations from period texts, this book is a feast for the mind and eye. Through many examples of the visual and auditory symbols that are central to Eucharist, readers will discover how Christian worship is embodied worship that from age to age gives glory to God and sanctifies people.

**Coming of Age in Times of Uncertainty** Jan 30 2020 Adulthood is taken for granted. It connotes the end of childhood, the resolution to the "storm and stress" period of adolescence. This conception is strongly

entrenched in the sociology of youth and the sociology of the life course as well as in the policy arena. At the same time, adulthood itself remains unarticulated; journey's end remains conceptually fixed and theoretically uncontested. Adulthood, then, is both central to the social imagination and neglected as an area of sociological investigation, something that has been noted by sociologists over the last four decades. Going beyond the overwhelmingly psychological literature, this book draws on original qualitative research and theories of social recognition and thus presents a first step towards filling an important gap in our understanding of the meaning of adulthood.

**Coming of Age in Shakespeare** Feb 22 2022 Marjorie Garber examines the rites of passage and maturation patterns--"coming of age"--in Shakespeare's plays. Citing examples from virtually the entire Shakespeare canon, she pays particular attention to the way his characters grow and change at points of personal crisis. Among the crises Garber discusses are: separation from parent or sibling in preparation for sexual love and the choice of husband or wife; the use of names and nicknames as a sign of individual exploits or status; virginity, sexual initiation and the acceptance of sexual maturity, childbearing and parenthood; and, finally, attitudes toward death and dying.

**Public Health Implications of Raising the Minimum Age of Legal Access to Tobacco Products** Nov 29 2019 Tobacco use by adolescents and young adults poses serious concerns. Nearly all adults who have ever smoked daily first tried a cigarette before 26 years of age. Current cigarette use among adults is highest among persons aged 21 to 25 years. The parts of the brain most responsible for cognitive and psychosocial maturity continue to develop and change through young adulthood, and adolescent brains are uniquely vulnerable to the effects of nicotine. At the request of the U.S. Food and Drug Administration, *Public Health Implications of Raising the Minimum Age of Legal Access to Tobacco Products* considers the likely public health impact of raising the minimum age for purchasing tobacco products. The report reviews the existing literature on tobacco use patterns, developmental biology and psychology, health effects of tobacco use, and the current landscape regarding youth access laws, including minimum age laws and their enforcement. Based on this literature, the report makes conclusions about the likely effect of raising the minimum age to 19, 21, and 25 years on tobacco use initiation. The report also quantifies the accompanying public health outcomes based on findings from two tobacco use simulation models. According to the report, raising the minimum age of legal access to tobacco products, particularly to ages 21 and 25, will lead to substantial reductions in tobacco use, improve the health of Americans across the lifespan, and save lives. *Public Health Implications of Raising the Minimum Age of Legal Access to Tobacco Products* will be a valuable reference for federal policy makers and state and local health departments and legislators.

In *Coming of Age in Iran*, Manata Hashemi takes us inside the lives of poor Iranian youth, showing how these young men and women face their future prospects. Drawing on first-hand accounts, Hashemi follows their stories, one by one, as they struggle to climb up the proverbial ladder of success. Based on years of ethnographic research among these youth in their homes, workspaces, and places of leisure, Hashemi shows how public judgments can give rise to meaningful changes for some while making it harder for others to escape poverty. Ultimately, Hashemi sheds light on the pressures these young men and women face, showing how many choose to comply with—rather than resist—social norms in their pursuit of status and belonging. *Coming of Age in Iran* tells the unprecedented story of how Iran's young and struggling attempt to extend dignity and alleviate misery, illuminating the promises—and limits—of finding one's place during a time of profound uncertainty.
