Biology Apr 28 2022 This is a user-friendly and practical guide for UK practitioners and those managing UK firms on the day-to-day legal issues that arise in the specialist field of partnerships and LLPs. The book is written by three authors: a leading partnership and LLP barrister with many years of litigation experience, a solicitor with specialist expertise in partnership and LLP structures and agreements, and a respected academic in the field. It provides clear and practical guidance on the main issues that arise time and again in UK partnerships and LLPs. While there are many important differences between traditional partnerships and LLPs, the practical issues that they face are often similar, and the book therefore tackle both areas. The focus is mainly on those areas that regularly cause difficulty in firms (be they traditional partnership or LLP). Subjects covered include: the legal nature and characteristics of partnerships and LLPs * factors influencing choice of legal entity * the essential elements of partnership and members' agreements * management structures including management boards and partnership councils * conduct of meetings * partnership/LLP property and profits and losses * accounts, taxation, and audit * partner and member retirements and expulsions * duties of partners and members * Equality Act implications * suspension and garden leave * personal liability issues * dissolution and winding-up * goodwill * disputes: mediation, arbitration, and court proceedings * mergers, acquisitions, and conversions.

Undercover Epicenter Nurse Feb 12 2021 Undercover Epicenter Nurse blows the lid off the COVID-19 pandemic. What would you do if you discovered that the media and the government were lying to us all? And that hundreds, maybe thousands of people were dying because of it? Army combat veteran and registered nurse Erin Olszewski's most deeply held values were put to the test when she arrived as a travel nurse at Elmhurst Hospital in the epicenter of the COVID-19 pandemic. After serving in Iraq, she was back on the front lines—and this time, she found,

the situation was even worse. Rooms were filthy, nurses were lax with sanitation measures, and hospital-acquired cases of COVID-19 were spreading like wildfire. Worse, people who had tested negative multiple times for COVID-19 were being labeled as COVID-confirmed and put on COVID-only floors. Put on ventilators and drugged up with sedatives, these patients quickly deteriorated—even though they did not have coronavirus when they checked in. Doctors-in-training were refusing to perform CPR—and banning nurses from doing it—on dying patients whose families had not consented to “Do Not Resuscitate” orders. Erin wasn't about to stand by and let her patients keep dying on her watch, but she knew that if she told the truth, people wouldn't believe her. It was just too shocking. Willing to go to battle for her patients, Erin made the decision to go deep undercover, recording conversations with other nurses, videos of malpractice, and more. She began to share what she found on social media. Unsurprisingly, she was fired for it. Now, Erin is standing up to tell the whole horrifying story of what happened inside Elmhurst Hospital to demand justice for those who fell victim to the hospital's greed. Not only must the staff be held accountable for their unethical actions; but also, this kind of corruption must be destroyed so that future Americans are not put at risks. The deaths have to end, and Erin won't rest until the bad actors are exposed. Undercover Epicenter Nurse: How Fraud, Negligence, and Greed Led to Unnecessary Deaths at Elmhurst Hospital is a shocking and infuriating inside exposé of the American healthcare system gone wrong. At the same time, it's the story of a woman who traveled from the small-town streets of Wisconsin, to the battlefields of Iraq, to the mean streets of Queens, on a quest to help fight for her country. With this book, the real battle has begun.

Concepts of Biology Mar 16 2021 Concepts of Biology is designed for

the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, *Concepts of Biology* is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of *Concepts of Biology* is that instructors can customize the book, adapting it to the approach that works best in their classroom. *Concepts of Biology* also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Visualizing Human Biology Oct 11 2020 *Visualizing Human Biology* is a visual exploration of the major concepts of biology using the human body as the context. Students are engaged in scientific exploration and critical thinking in this product specially designed for non-science majors. Topics covered include an overview of human anatomy and physiology, nutrition, immunity and disease, cancer biology, and genetics. The aim of *Visualizing Human Biology* is a greater understanding, appreciation and working knowledge of biology as well as an enhanced ability to make healthy choices and informed healthcare decisions.
