2021 aug 14 2020 example 2 let w represent the width of the  
rectangle the length of a rectangle is 4 feet longer than its width  
express the length of the rectangle in terms of its width w solution  
we know that the width of the rectangle is w because the length of  
the rectangle is 4 feet longer than the width we must add 4 to the  
width to find the length

**cubic function wikipedia** Dec 21 2021 in mathematics a cubic  
function is a function of the form where the coefficients  $a$   $b$   $c$  and  $d$   
are complex numbers and the variable  $x$  takes real values and in  
other words it is both a polynomial function of degree three and a  
real function in particular the domain and the codomain are the set  
of the real numbers setting  $f(x) = 0$  produces a cubic equation of the  
form
