The Half-Life of Facts Oct 21 2021 New insights from the science of science Facts change all the time. Smoking has gone from doctor recommended to deadly. We used to think the Earth was the center of the universe and that the brontosaurus was a real dinosaur. In short, what we know about the world is constantly changing. Samuel Arbesman shows us how knowledge in most fields evolves systematically and predictably, and how this evolution unfolds in a fascinating way that can have a powerful impact on our lives. He takes us through a wide variety of fields, including those that change quickly, over the course of a few years, or over the span of centuries.

GRE Prep Plus 2022 Sep 27 2019 "6 practice tests + proven strategies + online."

New Abacus 5 May 16 2021 Each unit in the "New Abacus" programme begins with whole-class teaching. All the direct teaching to introduce a concept is on the front of the Teacher Card; the back has: further teaching; references to differentiated practical activities, workbook or textbook pages and photocopy masters.

Mathematics for Dyslexics and Dyscalculics Dec 31 2019 A seminal handbook in the field for more than 20 years, this new and updated edition of Mathematics for Dyslexics and Dyscalculics contains the latest research and best practices for helping learners with numerical and mathematical difficulties. Provides a complete overview of theory and research in the fields of dyslexia and dyscalculia, along with detailed yet pragmatic methods to apply in the classroom. Contains enhanced coverage of place value and the role of the decimal point, why fractions can challenge a developed logic for arithmetic, and the complexity of time along with new material on addressing anxiety, fear, motivation, and resilience in the classroom; and links to new resources including standardized tests and recommended reading lists. Written by two mathematics teachers with 30 years of teaching experience between them, much of it in specialist settings for students with specific learning difficulties. Offers effective teaching strategies for learners of all ages in a structured but accessible format.

Find the Errors! Oct 09 2020 Provides reproducible activities designed to help students find errors in spelling, punctuation, capitalization, and grammar.

The Family Parsha Book Apr 02 2020 Questions and answers on the weekly Torah reading designed for the entire family to enjoy. Includes the important lesson to be learned from each section of the Torah, a parsha puzzler, and Haftorah highlights.

University Physics Oct 01 2022 University Physics is designed for the two- or three-semester calculus-based physics course. The text has been developed to meet the scope and sequence of most university physics courses and provides a foundation for a career in mathematics, science, or engineering. The book provides an important opportunity for students to learn the core concepts of physics and understand how those concepts apply to their lives and to the world around them. Due to the comprehensive nature of the material, we are offering the book in three volumes for flexibility and efficiency. Coverage and Scope Our University Physics textbook adheres to the scope and sequence of most two- and three-semester physics courses nationwide. We have worked to make physics interesting and accessible to students while maintaining the mathematical rigor inherent in the subject. With this objective in mind, the content of this textbook has been developed and arranged to provide a logical progression from fundamental to more advanced concepts, building upon what students have already learned and emphasizing connections between topics and between theory and applications. The goal of each section is to enable students not just to recognize concepts, but to work with them in ways that will be useful in later courses and future careers. The organization and pedagogical features were developed and vetted with feedback from science educators dedicated to the project. VOLUME III Unit 1: Optics Chapter 1: The Nature of Light Chapter 2: Geometric Optics and Image Formation Chapter 3: Interference Chapter 4: Diffraction Unit 2: Modern Physics Chapter 5: Relativity Chapter 6: Photons and Matter Waves Chapter 7: Quantum Mechanics Chapter 8: Atomic Structure Chapter 9: Condensed Matter Physics Chapter 10: Nuclear Physics Chapter 11: Particle Physics and Cosmology

Half-Earth: Our Planet's Fight for Life Dec 23 2021 "An audacious and concrete proposal...Half-Earth completes the 86-year-old Wilson's valedictory trilogy on the human animal and our place on the planet." --Jedediah Purdy, New Republic In his most urgent book to date, Pulitzer Prize-winning author and world-renowned biologist Edward O. Wilson states that in order to stave off the mass extinction of species, including our own, we must move swiftly to preserve the biodiversity of our planet. In this "visionary blueprint for saving the planet" (Stephen Greenblatt), Half-Earth argues that the situation facing us is too large to be solved piecemeal and proposes a solution commensurate with the magnitude of the problem: dedicate fully half the surface of the Earth to nature. Identifying actual regions of the planet that can still be reclaimed--such as the California redwood forest, the Amazon River basin, and grasslands of the Serengeti, among others--Wilson puts aside the prevailing pessimism of our times and "speaks with a humane eloquence which calls to us all" (Oliver Sacks).

Influence Is Your Superpower Aug 26 2019 Rediscover the superpower that makes good things happen, from the professor behind Yale School of Management's most popular class "The new rules of persuasion for a better world."--Charles Duhigg, author of the bestsellers *The Power of Habit* and *Smarter Faster Better* You were born influential. But then you were taught to suppress that power, to follow the rules, to wait your turn, to not make waves. Award-winning Yale professor Zoe Chance will show you how to rediscover the superpower that brings great ideas to life. Influence doesn't

work the way you think because you don't think the way you think. Move past common misconceptions—such as the idea that asking for more will make people dislike you—and understand why your go-to negotiation strategies are probably making you less influential. Discover the one thing that influences behavior more than anything else. Learn to cultivate charisma, negotiate comfortably and creatively, and spot manipulators before it's too late. Along the way, you'll meet alligators, skydivers, a mind reader in a gorilla costume, Jennifer Lawrence, Genghis Khan, and the man who saved the world by saying no. Influence Is Your Superpower will teach you how to transform your life, your organization, and perhaps even the course of history. It's an ethical approach to influence that will make life better for everyone, starting with you.
