**China Coast Tales (Classic Reprint)** Jul 25 2019 Excerpt from China Coast Tales Foochow was convulsed, was rent in pieces, by a new excitement. The port was going to sleep commercially, that was certain; but it was always astir socially. True, it was so far away both from Shanghai and from Hong Kong, that it was out of the wash, so to speak, of their social revolutions. But this very distance from the great Eastern centres of fashionable typhoons had given Foochow, in commotions, an individuality of its own. Foochow had its own particular favourites, leaders of fashion, etiquette, and laws of precedence. In short, it had everything that renders a port formidable to a new-comer and delightful to an old resident. For Foochow had its old residents, the list of whom was headed by the British Consul and his wife, who had adorned the port for the last fifteen years. On the other hand, among the shifting population, i.e. amongst those who made no permanent mark on Foochow society, would have to be reckoned the entire Customs' staff. The Commissioners at any rate had been mostly antiquated, out-of-date men, who looked upon this place as their last post in China, and occupied themselves solely with piling dollars against their

coming retirement. The assistants had been either rabid sinologues or affable bachelors. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. ***Gravel Roads* Jun 27 2022** The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been "more of an art than a science" and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.

Language, Global Mobilities, Blue-Collar Workers and Blue-collar Workplaces Jun 23 2019 This collection brings together global perspectives which critically examine the ways in which language as a resource is used and managed in myriad ways in various blue-collar workplace settings in today's globalized economy. In focusing on blue-collar work environments, the book sheds further light on the informal processes through which top down language policies take place in different multilingual settings and the resultant asymmetrical power relations which emerge among employees and employers in such settings. Taking into account the latest debates on poststructuralist theories of language, the volume also extends its conceptualization of language to demonstrate the ways in which it extends to a wider range of multilingual and multimodal resources and communicative practices, all of which combine in unique and different ways toward constructing meaning in the workplace. The volume's unique focus on such workplaces also showcases domains of work which have generally until now been less visible within existing research on language in the workplace and the subsequent methodological challenges that arise from studying them. Integrating a range of theoretical and methodological approaches, along with empirical data from a diverse range of blue-collar workplaces, this book will be of particular interest to students and researchers in critical sociolinguistics, applied linguistics, sociology, and linguistic anthropology.

*Greater Cincinnati Religious Peacemakers* Mar 01 2020 Throughout human history, wars and violence have often been waged in the name of religions and in the name of diverging religious beliefs and belonging. Ironically, though, all religions in their teachings speak of nonviolence and have in common the promotion of peace and justice, namely the respect of human life and dignity, the institution of human rights, the protection of the poor and vulnerable, the freeing of the oppressed, the active elimination of injustice? It seems therefore, that violence and wars would be antithetical to religions; yet they are so frequently used as their justification. Are we then speaking of different "religions"? "Institutional religions," the ones structured by humans and that are brandished to lead violence and wars, become in fact quite foreign to the essence of the religions as they were established by their founders and that they intend to represent; they actually contribute to their destruction. Wanting to reflect on that point, I embarked, a few years ago, on giving voice to local religious individuals, whom I called "Religious Peacemakers," and who, each by living

the essential teachings of their particular faith, contributed by their actions to peace and justice. I wanted to prove that their path, irrespective of their original religion, would be similar, and that their diverse faith, instead of separating them, would on the contrary end up uniting them.

Youth Entrepreneurship and Local Development in Central and Eastern Europe Apr 01 2020 This book analyses the opportunities and barriers for youth entrepreneurship amid systemic change in Central and Eastern Europe. The authors cover different aspects of youth entrepreneurship and its contribution to the debate on youth unemployment in transition economies. The book discusses the wide-spread over-optimism regarding youth entrepreneurship, self-employment, and its impact on economic innovation and job creation, resulting from a disregard of critical contextual features and the characteristics of young entrepreneurs themselves. The authors give due acknowledgment of the importance of both factors and so fully understand the impediments to youth entrepreneurship, especially in a transition context. Furthermore, they seek to assess the opportunities and constraints of promotion policies in transition economies. Most importantly, the book provides the first empirical contribution to youth entrepreneurship in Central and Eastern Europe by offering a representative number of case studies. The book will be invaluable reading for scholars and students of transition and developing countries, particularly those with an interest in entrepreneurship.
