*Power and the Nation in European History* Nov 09 2020 Few would doubt the central importance of the nation in the making and unmaking of modern political communities. The long history of 'the nation' as a concept and as a name for various sorts of 'imagined community' likewise commands such acceptance. But when did the nation first become a fundamental political factor? This is a question which has been, and continues to be, far more sharply contested. A deep rift still separates 'modernist' perspectives, which view the political nation as a phenomenon limited to modern, industrialised societies, from the views of scholars concerned with the pre-industrial world who insist, often vehemently, that nations were central to pre-modern political life also. This book engages with these questions by drawing on the expertise of leading medieval, early modern and modern historians.

**Orphans and Abandoned Children in European History** Mar 02 2020 In a world dominated by poverty, a central characteristic has been the plight of orphans and abandoned children. Over the centuries, State, Church and individuals have all attempted to tackle the issue, but can we trace any change over the course of time when it comes to the welfare system intended for these disadvantaged children and acts of philanthropy? What kind of social policies did States follow and what were the main differences between countries and regions? Drawing on historical evidence across several centuries and a range of European countries, the contributors to this volume provide a transnational overview.

**The Shortest History of Europe** Oct 21 2021 Chinese civilisation was for a long period more advanced than European. From China, Europe acquired printing, paper-making, the compass, gunpowder and locks for canals. Yet it was in Europe that steady economic growth first occurred and then the Industrial Revolution. And it was in Europe that representative government and individual rights, those other hallmarks of modernity, first developed. What is it about Europe? Celebrated historian John Hirst offers a fascinating exploration of the qualities that made Europe a world-changing civilisation. The Shortest History of Europe begins with a rapid overview of European civilisation, describing its birth from an unlikely mixture of three elements- classical learning, Christianity and German warrior culture. Over the centuries, this unstable blend produced highly distinctive characters - pious knights and belligerent popes, romantics spouting folklore and revolutionaries imitating Rome - and its coming apart provided the dynamic of European history in modern times. Meanwhile the common people were tilling the soil, until they became the first to enjoy the prosperity of an industrialised urban society. The Shortest History of Europe is a clear, humorous and thought-provoking account of a remarkable civilisation.

bibliographies. I have received suggestions from the various collections of illustrative material which have been published from time to time, especially the Translations and Reprints issued from the University of Pennsylvania; the "source books" of Miss Kendall, Professor Colby, and Dr. Lee; Correard's *Choix de Textes*; and, above all, Schilling's *Quellenbuch*. A number of the translations from the French and German I owe to my wife, who has also given me her constant aid in the revision of the manuscript and the reading of the proof. *War, Peace and World Orders in European History* Oct 09 2020 This book explores a new way for students of International Relations to look at war, peace and world orders throughout European history. The contributors argue that the predominant 'realist' paradigm that focuses on states and their self-interest is not applicable to the largest period of European history, because states either did not exist or were only in the making. Instead, they argue, we have to look through the eyes of historical entities to see how they understood the world in which they lived. The authors use a wide range of case-studies, focusing on subjects as diverse as the ancient Greek concept of honour and persecution under Communist regimes during the Cold War to explore the ways in which people in different societies at different times perceived and felt about war and peace in the world around them.

*The Politics of Moderation in Modern European History* Dec 23 2021 This book charts the varieties of political moderation in modern European history from the French Revolution to

the present day. It explores the attempts to find a middle way between ideological extremes, from the nineteenth-century *Juste Milieu* and balance of power, via the Third Ways between capitalism and socialism, to the current calls for moderation beyond populism and religious radicalism. The essays in this volume are inspired by the widely-recognized need for a more nuanced political discourse. The contributors demonstrate how the history of modern politics offers a range of experiences and examples of the search for a middle way that can help us to navigate the tensions of the current political climate. At the same time, the volume offers a diagnosis of the problems and pitfalls of Third Ways, of finding the middle between extremes, and of the weaknesses of the moderate point of view.

**African Europeans** Jun 04 2020 A dazzling history of Africans in Europe, revealing their unacknowledged role in shaping the continent One of the Best History Books of 2021 – Smithsonian Conventional wisdom holds that Africans are only a recent presence in Europe. But in *African Europeans*, renowned historian Olivette Otele debunks this and uncovers a long history of Europeans of African descent. From the third century, when the Egyptian Saint Maurice became the leader of a Roman legion, all the way up to the present, Otele explores encounters between those defined as "Africans" and those called "Europeans." She gives equal attention to the most prominent figures—like Alessandro de Medici, the first duke of Florence thought to have been born to a free African woman in a Roman village—and the untold stories—like the lives of dual-heritage families in Europe's coastal trading towns. *African Europeans* is a landmark celebration of this integral, vibrantly complex slice of European history, and will redefine the field for years to come.

Scientific Practices in European History, 1200–1800 Apr 14 2021 *Scientific Practices in European History, 1200–1800* presents and situates a collection of extracts from both widely known texts by such figures as Copernicus, Newton, and Lavoisier, and lesser known but significant items, all chosen to provide a perspective on topics in social, cultural and intellectual history and to illuminate the concerns of the early modern period. The selection of extracts highlights the emerging technical preoccupations of this period, while the accompanying introductions and annotations make these occasionally complex works accessible to students and non-specialists. The book follows a largely chronological sequence and helps to locate scientific ideas and practices within broader European history. The primary source materials in this collection stand alone as texts in themselves, but in illustrating the scientific components of early modern societies they also make this book ideal for teachers and students of European history.

A single author lends a unified approach and consistent style throughout, with an emphasis on the connections of events and people over time. From the imperial rivalries between France and Spain in the sixteenth and seventeenth centuries, through the rise and fall of the Ottoman Turkish empire, and on into the imperial history of the twentieth century—decolonization, the spread of the Soviet empire, and the imperial power of the United States—the theme of empire helps students find commonalities among the events of European history.

**War in European History** Nov 02 2022 First published over thirty years ago, *War in European History* is a brilliantly written survey of the changing ways that war has been waged in Europe, from the Norse invasions to the present day. Far more than a simple military history, the book serves as a succinct and enlightening overview of the development of European society as a whole over the last millennium. From the Norsemen and the world of the medieval knights, through to the industrialized mass warfare of the twentieth century, Michael Howard illuminates the way in which warfare has shaped the history of the Continent, its effect on social and political institutions, and the ways in which technological and social change have in turn shaped the way in which wars are fought. This new edition includes a fully updated further reading and a new final chapter bringing the story into the twenty-first century, including the invasion of Iraq and the so-called 'War against Terror'.

*A Sourcebook of Early Modern European History* May 16 2021 *A Sourcebook of Early Modern European History* not only provides instructors with primary sources of a manageable length and translated into English, it also offers students a concise explanation of their context and meaning. By covering different areas of early modern life through the lens of contemporaries' experiences, this book serves as an introduction to the early modern European world in a way that a narrative history of the period cannot. It is divided into six subject areas, each comprising between twelve and fourteen explicated sources: I. The fabric of communities: Social interaction and social control; II. Social spaces: Experiencing and negotiating encounters; III. Propriety, legitimacy, fidelity: Gender, marriage, and the family; IV. Expressions of faith: Official and popular religion; V. Realms intertwined: Religion and politics; and, VI. Defining the religious other: Identities and conflicts. Spanning the period from c. 1450 to c. 1750 and including primary sources from across early modern Europe, from Spain to Transylvania, Italy to Iceland, and the European colonies, this book provides an excellent sense of the diversity and complexity of human experience during this time whilst drawing attention to key themes and events of the period. It is ideal for students of early modern history, and of early modern Europe in particular.

**Memory Laws, Memory Wars** Aug 26 2019 Laws against Holocaust denial are perhaps the best-

known manifestation of the present-day politics of historical memory. In *Memory Laws, Memory Wars*, Nikolay Kaposov examines the phenomenon of memory laws in Western and Eastern Europe, Ukraine, and Russia and exposes their very different purposes in the East and West. In Western Europe, he shows how memory laws were designed to create a common European memory centred on the memory of the Holocaust as a means of integrating Europe, combating racism, and averting national and ethnic conflicts. In Russia and Eastern Europe, by contrast, legislation on the issues of the past is often used to give the force of law to narratives which serve the narrower interests of nation states and protect the memory of perpetrators rather than victims. This will be essential reading for all those interested in ongoing conflicts over the legacy of the Second World War, Nazism, and communism.

**Migration in European History** Aug 19 2021 Since the fall of the Iron Curtain, migration has become a major cause for concern in many European countries, but migrations to, from and within Europe are nothing new, as Klaus Bade reminds us in this timely history. A history of migration to, from and within Europe over a range of eras, countries and migration types. Examines the driving forces and currents of migration, their effects on the cultures of both migrants and host populations, including migration policies. Focuses on the nineteenth and twentieth centuries, particularly the period from the Second World War to the present. Illuminates concerns about migration in Europe today. Acts as a corrective to the alarmist reactions of host populations in twenty-first century Europe.

**Domains and Divisions of European History** Oct 28 2019 The patterns of unity and division that define Europe as a historical region have been discussed in many seminal works, but the complex set of questions behind its domains and divisions merits a more sustained debate. The disappearance of the cold war, the enlargement of the European Union, and core issues of historical sociology all require an exploration of the structures and boundaries of historical formations, as well as the question of European unity. This volume tackles the topic of the divisions that have shaped European history head-on, as leading scholars in the field negotiate such issues as regional identity, geographical boundaries, divisional labeling, and post-cold war European unity.

*Themes in Modern European History 1780-1830* Jun 24 2019 *Themes in Modern European History 1780-1830* is an authoritative and lively exploration of a period dominated by events which have shaped modern Europe. In a series of articles, six leading academics present some controversial conclusions: \* the east/west contrast in Europe today has more to do with responses to the French Revolution of 1789 than the Russian Revolution of 1917 \* the conservative Europe of 1814 was the product of the Romantic imagination, not a 'Restoration' of the old regime Spanning political, social, economic and demographic facets of revolutions, this is an indispensable textbook for all students of the nineteenth century, and for all those interested in understanding the nature of Europe today.
