The Great Wave Nov 14 2021 Fischer has examined price records in many nations, and finds that great waves of rising prices in the 13th-, 16th-, 18th-, and 20th centuries were all marked by price swings of increasing volatility, falling wages, a growing gap between rich and poor, and an increase in violent crime, family disintegration, and cultural despair. 109 graphs & charts. 7 maps.

TOWARDS A CRITICAL SOCIOLOGY OF FINANCE Sep 24 2022 Evidences pile up to prove that financial markets are sometimes irrational, and contingently much influenced by public speeches like the ones delivered by central bankers and politicians. Since ideologies and discourses matter in the financial sector, and have very tangible impacts on investors' decisions worldwide, this book argues that we urgently need a new sociology of finance, one equipped with a critical commitment and an innovative, standardized method for argumentation analysis. Accordingly, the new approach is firstly described theoretically and methodologically, in an open, constructive dialogue with potential complementary approaches like cultural political economy and critical discourse analysis. Then, the outcomes of some empirical analyses are displayed and discussed: from the battles of opposite financial ideologies in the decade 2008-2018, through the analysis of "dovish" speeches in monetary policy, to a case-study focused on Bitcoin's complex ideology. In this way, *Towards A Critical Sociology of Finance* promises to equip the reader (and eventually the financial investor) with some critical skills to recognize and doubt financial ideologies and to become sensible to distracting argumentative strategies like buck passing and scapegoats building, as well as to other variously fallacious arguments.

1995 Feb 17 2022 Annually published since 1930, the International bibliography of Historical Sciences (IBOHS) is an international bibliography of the most important historical monographs and periodical articles published throughout the world, which deal with history from the earliest to the most recent times. The works are arranged systematically according to period, region or historical discipline, and within this classification alphabetically. The bibliography contains a geographical index and indexes of persons and authors.

The Italian Difference Jul 22 2022 This volume brings together essays by different generations of Italian thinkers which address, whether in affirmative, problematizing or genealogical registers, the entanglement of philosophical speculation and political proposition within recent Italian thought. Nihilism and biopolitics, two concepts that have played a very prominent role in theoretical discussions in Italy, serve as the thematic foci around which the collection orbits, as it seeks to define the historical and geographical particularity of these notions as well their continuing impact on an international debate. The volume also covers the debate around Olympe de Gouges' thought (pensiero debole), the feminist thinking of sexual difference, the re-emergence of political anthropology and the question of communism. The contributors provide contrasting narratives of the development of post-war Italian thought and trace paths out of the theoretical and political impasses of the present against what Negri, in the text from which the volume takes its name, calls "the Italian desert."

Histoire de la révolution de 1870-71 Jul 30 2020

European and Chinese Histories of Economic Thought Oct 13 2021 The Western literature on the history of Chinese economic thought is sparse, and comparisons with the history of Western economic thought even more so. This pioneering book brings together Western and Chinese scholars to reflect on the historical evolution of economic thought in Europe and China. The international panel of contributors cover key topics such as currency, usury, land tenure, the granary system, welfare, and government, and special attention is given to monetary institutions and policies. The problem of "good government" emerges as the unifying thread of a complex analysis that includes both theoretical issues and applied economics. Chinese lines of evolution include the problem of the agency of the State, its ideological justification, the financing of public expenditure, the role played by the public administration, and the provision of credit. The early radical condemnation of usury in the Near East and in the West gives way to theoretical justifications of interest-taking in early capitalist Europe; they, in turn, lead to advances in mathematics and business administration and represent one of the origins of modern economic theory. Other uniting themes include the relationship between metallic and paper money in Chinese and European experiences and the cross-fertilization of economic practices and ideas in the course of their pluri-millennial interactions. Differences emerge; the approach to the organization of economic life was, and still is, more State-centred in China. The editors bring together these analytical threads in a final chapter, opening wider horizons for this new line of comparative economic research which is important for the understanding of modern ideological turns. This volume provides valuable reading for scholars in the history of economic thought, economic history and Chinese studies.

A Contribution to the Critique of Political Economy Jul 10 2021 DigiCat Publishing presents to you

this special edition of "A Contribution to the Critique of Political Economy" by Karl Marx. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature.

Histoire de la Revolution de 1870-1871 ... Illustrée de portraits, vues, ... et autographes Sep 12 2021

Early Histories of Economic Thought, 1824-1914: Early histories of economic thought, 1824-1914 May 08 2021 The books reprinted in this set greatly influenced the way the development of economics was perceived and how the history of economics was viewed. Many of the titles represent the first attempts to chart the history of economics both from European and American perspectives. Titles cover the USA, UK, Germany and France, and include: * History of Political Economy from Antiquity to our days [1880]-"Jerome Adolphe Blanqui" * View of the Progress of Political Economy in Europe [1847]-"Travers Twiss" * A Short History of Political Economy in England [1891]-"L.L. Price" * The History of Economics [1896/1911]-"Henry Dunning MacLeod" * History of Economic Thought [1911/1930]-"Lewis H. Haney" * History of Economic Doctrines [1915]-"Charles Gide"and "Charles Rist" * Types of Economic Theory [1930]-"Othmar Spann" * Philosophy and Political Economy in Some of their Historical Relations [1893]-"James Bonar" * The Development of English Thought: a Study in the Economic Interpretation of History [1899]-"Simon N. Patten" * A Guide to the Study of Political Economy [1876]-"Luigi Cossa"

Per un pugno di bitcoin Jun 28 2020 Molti parlano di bitcoin, ma pochi li usano. Sono davvero l'inizio di una nuova economia o solo l'ultimo oggetto di una bolla speculativa? Grazie a una tecnologia all'avanguardia, i bitcoin possono essere creati, trasferiti e accumulati senza l'intermediazione del

sistema bancario. Tuttavia solo una minima parte è utilizzata per il pagamento di beni e servizi nell'economia reale. La maggioranza è detenuta come strumento di speculazione, se non addirittura utilizzata per finanziare attività illegali. La grande volatilità del loro valore è un accidente temporaneo destinato ad attenuarsi o un carattere intrinseco che rivela un difetto di costruzione? Quali sono i rischi e le opportunità connessi alla loro diffusione?

The History of Economics Apr 07 2021 Book II is arranged alphabetically under subjects.

From Oikonomia to Political Economy Nov 02 2020 Renaissance Europe witnessed a surge of interest in new scientific ideas and theories. Whilst the study of this 'Scientific Revolution' has dramatically shifted our appreciation of many facets of the early-modern world, remarkably little attention has been paid to its influence upon one key area; that of economics. Through an interrogation of the relationship between economic and scientific developments in early-modern Western Europe, this book demonstrates how a new economic epistemology appeared that was to have profound consequences both at the time, and for subsequent generations. Dr Maifreda argues that the new attention shown by astronomers, physicians, aristocrats, men of letters, travellers and merchants for the functioning of economic life and markets, laid the ground for a radically new discourse that envisioned 'economics' as an independent field of scientific knowledge. By researching the historical context surrounding this new field of knowledge, he identifies three key factors that contributed to the cultural construction of economics. Firstly, Italian Humanism and Renaissance, which promoted new subjects, methods and quantitative analysis. Secondly, European overseas expansion, which revealed the existence of economic cultures previously unknown to Europeans. Thirdly factor identified is the fifteenth- and sixteenth-century crisis of traditional epistemologies, which increasingly valued empirical scientific knowledge over long-held beliefs.

Based on a wide range of published and archival sources, the book illuminates new economic sensibilities within a range of established and more novel scientific disciplines (including astronomy, physics, ethnography, geology, and chemistry/alchemy). By tracing these developments within the wider social and cultural fields of everyday commercial life, the study offers a fascinating insight into the relationship between economic knowledge and science during the early-modern period.

Collected Works. Illustrated Aug 11 2021 Karl Heinrich Marx was a German philosopher, economist, historian, sociologist, political theorist, journalist and socialist revolutionary. It is hard to think of many who have had as much influence in the creation of the modern world. In addition to his overtly philosophical early work, his later writings have many points of contact with contemporary philosophical debates, especially in the philosophy of history and the social sciences, and in moral and political philosophy. Historical materialism — Marx's theory of history — is centered around the idea that forms of society rise and fall as they further and then impede the development of human productive power. Marx's economic analysis of capitalism is based on his version of the labour theory of value, and includes the analysis of capitalist profit as the extraction of surplus value from the exploited proletariat. Marx sees the historical process as proceeding through a necessary series of modes of production, characterized by class struggle, culminating in communism.

War-chronicle Nov 21 2019

Love, Self-deceit, and Money Apr 26 2020 "In Love, Self-Deceit, and Money, Koen Stapelbroek

reconstructs the early Neapolitan Enlightenment debate on the morality of market societies, a debate that hinged on the preservation of Naples' independent statehood in a global arena of commercial and military competition. Galiani rejected the opinions of many of his contemporaries regarding the moral and economic dangers threatening Naples, and, in his *Della moneta* (1751), he justified the systems set in place by the Neapolitan government. With reference to early, previously unstudied lectures on self-deceptive 'Platonic love,' Stapelbroek examines Galiani's role in the wider debate, arguing that his early work in moral philosophy and history suggests a great deal about his political-economic stance, including his assertion that money is the ultimate ordering principle in the universe."--Jacket.

dig.ital r.evolution. 5 lezioni per la riqualificazione delle imprese italiane Mar 06 2021 Il volume traccia un percorso sulle tecnologie per le imprese italiane che vogliono far parte attiva della "rivoluzione digitale". Il capitolo I, riguarda l'impresa produttrice: cloud computing, stampa 3D e 4D, Internet delle cose, guida senza pilota, Impresa 4.0, comprese le misure di incentivazione. Il capitolo II, interfaccia l'innovazione con la tutela: accanto al Patent Box ed ai "rimedi" alla contraffazione on line, si colloca, per es., la tracciabilità dei prodotti con codici QR. Il capitolo III, sposta l'attenzione sulle tendenze per la riqualificazione innovativa della distribuzione commerciale: tagging, sistemi predittivi, mobile e social commerce. Il capitolo IV, tratta il tema della logistica. La consegna dei prodotti alimentari appare l'"ultimo miglio" del commercio elettronico, per cui si descrivono come funzionano (e costano) i modelli di consegna utilizzati in Italia dai principali operatori (Esselunga, Amazon, etc.). Infine, il capitolo V, concerne i pagamenti su Internet: dalle carte di credito on line e virtuali, alle monete elettroniche (compreso il Bitcoin), ai pagamenti con

smartphone e tablet e tecnologie Rfid e NFC, fino al riconoscimento biometrico con i selfie.

Charity and State in Late Renaissance Italy Mar 26 2020 Drawing on extensive archival evidence, Carol Bresnahan Menning examines the remarkable evolution of the Florentine monte from a small charitable pawnshop to a flourishing savings organization and a powerful instrument of patronage and state finance.

Mining, Money and Markets in the Early Modern Atlantic Feb 05 2021 This volume documents recent efforts to track the transformation and trajectory of silver during the early modern period, from its origins in ores located on either side of the Atlantic to its use as currency in the financial centres of continental Europe. As a point of comparison, copper mining and its monetary use in the early modern Atlantic World will also be considered. Contributors rely mainly on economic and economic history methodologies, complemented by geographical and cultural history approaches. The use of novel software applications as tools to explain economic-historical episodes is also detailed.

Da Zero alla Luna - quando, come, perché la blockchain sta cambiando il mondo - Seconda

edizione ampliata May 28 2020 Da tanti anni sentiamo sempre più parlare di Bitcoin e criptovalute, un po' meno della rivoluzionaria tecnologia alla base: la blockchain. La "catena di blocchi" è una rivoluzione che in pochi anni sta spazzando via o rendendo obsoleti molti sistemi tradizionali che eravamo abituati a utilizzare da secoli. Ci troviamo di fronte a un nuovo paradigma che comporterà conseguenze dirette, non solo a livello tecnologico ma anche sul piano economico e sociale. Questo libro permette anche a un neofita di comprendere la tecnologia blockchain e tutte le sue applicazioni teoriche e pratiche, scoprire i progetti nati in questi anni e avere a disposizione una vera e propria guida che lo aiuti a districarsi nei meandri dell'evoluzione tecnologica che stiamo subendo. Questo è il tuo manuale di istruzioni per un futuro che è già passato.

Bulletin of the Public Library of the City of Boston Jan 24 2020

Histoire de France Depuis Les Origines Jusqu'à la Révolution Aug 23 2022

Money and Banking in Medieval and Renaissance Venice Jan 16 2022 At the time it was first published, this book made a significant contribution to the history of money and economics by underscoring the large role that Venice played in the economic history of the West and the ascendance of capitalism as a structuring force of society.

Classical Economics Today Jun 16 2019 "Classical Economics Today: Essays in Honor of Alessandro Roncaglia" comprises a collection of original essays by leading economists who adopt a Classical approach to political economy. The essays showcase the relevance and topicality of the Classical approach, as opposed to the sterility and real-world irrelevance of mainstream economics.

Between Two Cultures Dec 15 2021 In this wise and witty work, a world-renowned economic historian takes us behind the scenes to observe a small band of scholars reconstructing the past with the tools of economic analysis and the narrative power of the traditional historian.

Le criptovalute Sep 19 2019 Le cause della crisi economica, iniziata nel 2007 e mai conclusa, sono state attribuite per lo più al funzionamento dei mercati finanziari e monetari, e per questa ragione sono stati proposti degli oggetti - criptovalute, virtual currency, digital currency, monete complementari etc. -, che vorrebbero sostituire o affiancare le monete legali, garantite da uno Stato e da una Banca Centrale. Si tratta di oggetti che, nelle intenzioni, vorrebbero rendere la finanza e le monete più stabili e più eque, e che vedono la luce per iniziativa di singoli o di società private, mettendo così in discussione l'impianto pubblico che caratterizza questi specifici ambiti economici. Il testo confronta la natura e le funzioni delle monete legali con i nuovi oggetti "moneta", al fine di indagarne le novità culturali e sociali, poiché questi oggetti ambiscono a riorganizzare l'impianto su cui si reggono le monete che quotidianamente utilizziamo: gli scambi e i pagamenti all'interno di una polis; la loro regolazione giuridica; i calcoli, in ultima analisi matematici, delle equivalenze delle merci scambiate; la tesaurizzazione delle monete, necessaria per acquisire beni in un tempo differito o per speculare sulle monete stesse. Il libro propone delle chiavi di lettura sul funzionamento, i limiti e le potenzialità di ciascuno di questi nuovi oggetti "moneta".

The American Journal of Sociology Apr 19 2022 Established in 1895 as the first U.S. scholarly journal in its field, AJS remains a leading voice for analysis and research in the social sciences, presenting work on the theory, methods, practice, and history of sociology. AJS also seeks the application of perspectives from other social sciences and publishes papers by psychologists, anthropologists, statisticians, economists, educators, historians, and political scientists.

A Sterner Plan for Italian Unity Oct 21 2019 Italy in 1850 was a politically weak and divided country. The revolutionary spirit of 1848 had faded; much of the country was again under foreign control. Her political leaders were in exile, but they could not dismiss their dreams of a united Italy.

Raymond Grew, in his account of the Italian National Society, shows the part that the Society had in realizing these dreams, and presents fresh material on the climactic years of the Risorgimento—who participated in it, what issues were involved, and how unification was accomplished. Drawing upon unpublished materials from archives and libraries throughout Europe, the author presents a comprehensive picture of the social, political, and intellectual climate of the period in which Italy became a nation. Originally published in 1963. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Confronting America Aug 19 2019 Throughout the Cold War, the United States encountered unexpected challenges from Italy and France, two countries with the strongest, and determinedly most anti-American, Communist Parties in Western Europe. Based primarily on new evidence from communist archives in France and Italy, as well as research archives in the United States, Alessandro Brogi's original study reveals how the United States was forced by political opposition within these two core Western countries to reassess its own anticommunist strategies, its image, and the general meaning of American liberal capitalist culture and ideology. Brogi shows that the resistance to Americanization was a critical test for the French and Italian communists' own legitimacy and existence. Their anti-Americanism was mostly dogmatic and driven by the Soviet Union, but it was also, at crucial times, subtle and ambivalent, nurturing fascination with the

American culture of dissent. The staunchly anticommunist United States, Brogi argues, found a successful balance to fighting the communist threat in France and Italy by employing diplomacy and fostering instances of mild dissent in both countries. Ultimately, both the French and Italian communists failed to adapt to the forces of modernization that stemmed both from indigenous factors and from American influence. Confronting America illuminates the political, diplomatic, economic, and cultural conflicts behind the U.S.-communist confrontation.
