*Arabic Second Language Learning and Effects of Input, Transfer, and Typology* Jul 30 2022 Despite the status of Arabic as a global language and the high demand to learn it, the field of Arabic second language acquisition remains underinvestigated. Second language acquisition findings are crucial for informing and advancing the field of Arabic foreign language pedagogy including Arabic language teaching, testing, and syllabus design. *Arabic Second Language Learning and Effects of Input, Transfer, and Typology* provides data-driven empirical findings for a number of basic and high-frequency morphosyntactic structures with two novel typological language pairings, examining Arabic second language acquisition data from adult L1 Chinese- and Russian-speaking learners of Arabic as a foreign language. Alhawary's study examines the different processes, hypotheses, and acquisition tendencies from the two learner groups, and documents the extent of the successes and challenges faced by such learners in their L2 Arabic grammatical development during the first three years of learning the language. In addition, the book offers both theoretical and practical implications related to input exposure, L1 and L2 transfer, and typological and structural proximity effects. This book serves as a valuable resource for both second language acquisition experts and foreign language teaching practitioners.

**Tea War** Jul 06 2020 A history of capitalism in nineteenth- and twentieth-century China and India exploring the competition between their tea industries Tea remains the world's most popular commercial drink today, and at the turn of the twentieth century, it represented the largest export industry of both China and colonial India. In analyzing the global competition between Chinese and Indian tea, Andrew B. Liu challenges past economic histories premised on the technical "divergence" between the West and the Rest, arguing instead that seemingly traditional technologies and practices were central to modern capital accumulation across Asia. He shows how competitive pressures compelled Chinese merchants to adopt abstract, industrial conceptions of time, while colonial planters in India pushed for labor indenture laws to support factory-style tea plantations. Further, characterizations of China and India as premodern backwaters, he explains, were themselves the historical result of new

notions of political economy adopted by Chinese and Indian nationalists, who discovered that these abstract ideas corresponded to concrete social changes in their local surroundings. Together, these stories point toward a more flexible and globally oriented conceptualization of the history of capitalism in China and India.

**Dwelling in the World** Nov 29 2019 By the early twentieth century, Chinese residents of the northern treaty-port city of Tianjin were dwelling in the world. Divided by nine foreign concessions, Tianjin was one of the world's most colonized and cosmopolitan cities. Residents could circle the globe in an afternoon, strolling from a Chinese courtyard house through a Japanese garden past a French Beaux-Arts bank to dine at a German café and fall asleep in a British garden city-style semi-attached brick house. *Dwelling in the World* considers family, house, and home in Tianjin to explore how tempos and structures of everyday life changed with the fall of the Qing Empire and the rise of a colonized city. Elizabeth LaCouture argues that the intimate ideas and practices of the modern home were more important in shaping the gender and status identities of Tianjin's urban elites than the new public ideology of the nation. Placing the Chinese home in a global context, she challenges Euro-American historical notions that the private sphere emerged from industrialization. She argues that concepts of individual property rights that emerged during the Republican era became foundational to state-society relations in early Communist housing reforms and in today's middle-class real estate boom. Drawing on diverse sources from municipal archives, women's magazines, and architectural field work to social surveys and colonial records, *Dwelling in the World* recasts Chinese social and cultural history, offering new perspectives on gender and class, colonialism and empire, visual and material culture, and technology and everyday life.

The Citizen and the Chinese State Nov 09 2020 This volume addresses several core questions regarding the nature of law in China and its future development. In particular, these articles shed light on whether the rule of law ideal is commensurable with government based on the Chinese Communist Party. Beginning virtually from scratch, China has established a comprehensive legal system that boasts a constitution, primary and secondary legislation and plentiful regulations covering most areas of public and private life. Yet, as these articles discuss, its courts are enmeshed in Party and state hierarchies and are not empowered to directly apply constitutional principles or rights, ensuring that the law is subordinate to national public policy goals. Legal and extra-legal methods for punishing wrongdoing and resolving disputes also raise questions of due process of law. Ultimately, the question is therefore whether China's legal system, if eschewing formalised human rights, is developing a capacity to protect fundamental human dignity.

Chinese Art in Detail Feb 22 2022 Drawing on the British Museum's extensive collection, this book explores the traditional hierarchy of materials and techniques reaching back as far as the Han Dynasty in the third century BC. In the history and character of the works under scrutiny, this sumptuously illustrated book conveys an understanding of Chinese art in all its great variety.

**Contrastive Studies in Morphology and Syntax** Aug 19 2021 Using different theoretical approaches and frameworks, this book addresses a broad range of themes in contrastive linguistics, including inflection, derivation and compounding, tense, wh-questions, post-verbal subjects, focus and clitics, among others. Comparing English, German, Greek, Romance, Slavic and South Pacific languages, the book highlights the significance of the contrastive perspective for language-specific description and general interface issues, casting light on contrasts between languages at the levels of morphology and syntax. In this respect, it makes a valuable contribution to our understanding of language typology and language universals.

Fossilized Second Language Grammars Aug 07 2020 This monograph is a theoretical and empirical investigation into the mechanisms and causes of successful and unsuccessful adult second language acquisition. Couched within a generative framework, the study explores how a learner's first language and the age at which they acquire their second language may contribute to the L2 knowledge that they can ultimately attain. The empirical study focuses on a group of very advanced L2 speakers, and through a series of tests aims to discover what underpins their near mastery of grammatical gender and other grammatical properties. The book explores an account of persistent selective divergence based on the idea that child and adult learners are fundamentally similar, except that in adults the L1 plays the role of a fairly rigid filter of the linguistic input. The impossibility of representing the new target language other than by using the building blocks of the previously established L1 is argued to be the main reason why near but not totally native like language representations are formed and become established in adult L2 learners.

The Chinese Machiavelli Jun 04 2020 Machiavelli drew on 2000 years of history to develop theories on how to make war, how

to win battles, and how to gain power and keep it. Using Machiavelli as a springboard, Dennis and Ching Ping Bloodworth boldly and adroitly map out 3000 years of Chinese political-military history--from Confucius to Mao Zedong--using Machiavelli's discourse of power politics. They reveal a pageantry of Chinese historical figures, from wise strategists, heroic generals, crafty statesmen, and ruthless emperors to brave knights-errant, and from stately Confucian philosophers to shrewd, cunning Legalist thinkers, without the usual Confucian restraint. The Chinese Machiavelli intends to help Western readers, who may be puzzled by Chinese diplomatic and military strategy, understand the principles that have guided both past and present Chinese leaders. For instance, why have modern communist Chinese leaders often befriended right-wing European politicians who are out of office rather than left-wing leaders in power? Why did they entertain President Nixon while the United States was at war with North Vietnam? Within the framework of a chronological history concentrating on power politics and using the social and cultural scene as a backdrop, the Bloodworths use China's long history to find answers. Peter Li's preface for this new edition explains the structure of the book and offers a penetrating analysis of the authors' style and method. Although *The Chinese Machiavelli* is authored for the general public rather than for the specialist, the latter will also benefit from reading this history. The authors describe the continuity of Chinese history and reveal how knowledge of China's past sheds light on the political behavior of China's rulers today.

**The Last Half Century of Chinese Overseas** Aug 31 2022 The papers collected in this anthology look at Chinese overseas, residing in five continents in the half century after the Second World War, from many new perspectives. Some papers raise questions about the Chinese diaspora in broad conceptual terms, and inquire into the meaning of being Chinese outside China. Other papers examine life in local communities, analysing how historical and contemporary circumstances affect their lives and the ways they negotiate their identity in the host country. In-depth case studies further bring out the complexity of the subject by identifying the range of variables, including the social, economic, political and cultural characteristics of the places of origin and destinations, as well as emigration and immigration policies, which affect the patterns of migration and the nature of settlement in any place at any time. This is especially highlighted in chapters using a comparative approach. With scholars from different disciplines, using different types of data, methodologies and theoretical tools, the richness of the subject matter becomes apparent. This volume will no doubt go a long way both to broaden and deepen our understanding of the Chinese overseas, and, by showing the many possibilities for further investigation, to strengthen Chinese overseas as a field of study.

Hegemony and Democracy Sep 27 2019 Hegemony and Democracy is constructed around the question of whether hegemony is sustainable, especially when the hegemon is a democratic state. The book draws on earlier publications over Bruce Russett's long career and features new chapters that show the continuing relevance of his scholarship. In examining hegemony during and after the Cold War, it addresses: The importance of domestic politics in the formulation of foreign policy; The benefits and costs of seeking security through military power at the expense of expanding networks of shared national and transnational institutions; The incentives of other states to bandwagon with a strong but unthreatening hegemon and 'free-ride' on benefits it may provide rather than to balance against a powerful hegemon. The degree to which hegemony and democracy undermine or support each other. By applying theories of collective action and foreign policy, Russett explores the development of American hegemony and the prospects for a democratic hegemon to retain its influence during the coming decades. This collection is an essential volume for students and scholars of International Relations, American Politics, and US Foreign Policy.

Berkshire Dictionary of Chinese Biography Jul 26 2019 The Berkshire Dictionary of Chinese Biography, the first publication of its kind since 1898, is the work of more than one hundred internationally recognized experts from nearly a dozen countries. It has been designed to satisfy the growing thirst of students, researchers, professionals, and general readers for knowledge about China. It makes the entire span of Chinese history manageable by introducing the reader to emperors, politicians, poets, writers, artists, scientists, explorers, and philosophers who have shaped and transformed China over the course of five thousand years. In 135 entries, ranging from 1,000 to 8,000 words and written by some of the world's leading China scholars, the Berkshire Dictionary of Chinese Biography takes the reader from the important (even if possibly mythological) figures of ancient China to Communist leaders Mao Zedong and Deng Xiaoping. The in-depth essays provide rich historical context, and create a compelling narrative that weaves abstract concepts and disparate events into a coherent story. Cross-references between the articles show the connections between times, places, movements, events, and individuals.

Culture, Music Education, and the Chinese Dream in Mainland China Dec 31 2019 This book focuses on the rapidly changing sociology of music as manifested in Chinese society and Chinese education. It examines how social changes and cultural politics affect how music is currently being used in connection with the Chinese dream. While there is a growing trend toward incorporating the Chinese dream into school education and higher education, there has been no scholarly discussion to date. The combination of cultural politics, transformed authority relations, and officially approved songs can provide us with an understanding of the official content on the Chinese dream that is conveyed in today's Chinese society, and how these factors have influenced the renewal of values-based education and practices in school music education in China.
